

June 29, 2009

Charles Miller, Director  
Office of Federal and State Materials  
and Environmental Management Programs  
Attention: Angela R. McIntosh, Mail Stop T8-E24  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-0001

Dear Dr. Miller,

On May 9, 2009, Dominion Resources Services, Inc. ("DRS"), on behalf of Dominion Virginia Power, provided its response to the U.S. Nuclear Regulatory Commission's ("NRC") Demand for Information ("Demand"). As DRS indicated in its response, it expected that continued inventory and tracking efforts may locate additional TES. Indeed, those efforts have located an additional 60 TES, to date. The purpose of this letter is to update the May 9, 2009 response to incorporate this revised information.

In addition, DRS has determined that it inadvertently counted one (1) TES twice in its initial response. That TES was recorded at both the Luthersburg and Luther Station DTI locations. In fact, the Luthersburg and Luther Station locations are the same location. One TES has also been installed at North Anna that was previously in inventory at that location.

As a result of these developments, some of the numbers provided in Section B of DRS' previous response have changed. Based upon this new information, DRS concludes that there currently are 1159 TES (versus 1100 previously reported) in 249 locations (versus 250 previously reported). Of those TES, 921 are in active use (versus 875 previously reported), and 59 are in inventory, pending installation (versus 46 previously reported). The remaining numbers that were reported in Section B of the previous response are unchanged.

DRS has modified the matrix that was previously provided to the NRC as Attachment 1 to its response to the Demand, and has attached the revised matrix here. All changes are highlighted for your convenience.

As noted above, DRS has an ongoing TES inventory program and as such, the number of TES in or out of service may change in the future. However, unless DRS concludes that subsequently modified TES totals (due to additional TES discoveries or changes in use) are material to the initial Demand response or to this follow-up Demand response, we do not anticipate sending additional TES update letters to the NRC unless required

by associated regulations. Please contact me at (804) 771-6835 should you have any questions regarding this letter or its enclosure.

Sincerely,

A handwritten signature in black ink, appearing to read "Willie L. Holt".

Willie L. Holt  
Director, Facilities Management  
Dominion Resources Services, Inc.

Enclosure: Revised Response to Demand for Information, Attachment 1
