Mr. Melissa L. Dubinsky:

We have reviewed the following proposed project (s) as to its effect regarding religious and/or cultural significance to historic properties that may be affected by an undertaking of the projects area of potential effect.

Project Description: Expanded transmission line corridor

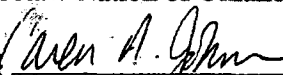

Project No: Callaway NPP Site 345 kV

Project Location: Reform, MO

Comments: After further review of the above mentioned project (s), it has come to our attention that the project is out of our area of interest. The Choctaw Nation of Oklahoma Tribal Historic Preservation Office defers opinion on the above historic components regarding their potential eligibility to the Sac and Fox Nation Tribal Historic Preservation Office.

Sincerely,

Terry D. Cole
Tribal Historic Preservation Officer
Choctaw Nation of Oklahoma

RE: AmerenUE Proposed Transmission Line Corridor for Callaway Plant, near Reform, MO
Project No. 06-3624

Paul C. Rizzo Associates, Inc.
ATTN: Melissa L. Dubinsky
ExpoMart, Suite 270-E
105 Mall Boulevard
Monroeville, PA 15146-2288

Dear Dr. Dubinsky,

The Osage Nation Historic Preservation Office received your letter notifying the Nation of the proposed AmerenUE transmission line corridor for the Callaway Nuclear Power Plant near Reform, Missouri.

In accordance with the National Historic Preservation Act, (NHPA) [16 U.S.C. 470 §§ 470-470w-6] 1966, undertakings subject to the review process are referred to in S101 (d)(6)(A), which clarifies that historic properties may have religious and cultural significance to Indian tribes. Additionally, Section 106 of NHPA requires Federal agencies to consider the effects of their actions on historic properties (36 CFR Part 800) as does the National Environmental Policy Act (43 U.S.C. 4321 and 4331-35 and 40 CFR 1501.7(a) of 1969).

The Osage Nation has a vital interest in protecting its historic and ancestral cultural resources. **The Osage Nation requests a copy of the archaeological survey completed for the proposed transmission line corridor for the Callaway Nuclear Power Plant and requests a meeting with AmerenUE and its representatives to discuss the findings of the archaeological survey. Please contact the Osage Nation Historic Preservation Office with your response to this request.** The Osage Nation looks forward to receiving and reviewing the archaeological resource survey report for the proposed AmerenUE transmission line corridor for the Callaway Nuclear Power Plant near Reform, Missouri.

Should you have any questions or need any additional information please feel free to contact me at the number and/or email address listed below. Thank you for consulting with the Osage Nation on this matter.

Dr. Andrea A. Hunter
Tribal Historic Preservation Officer

this item:
She will
send a
concurrence
letter.
Indubitably*

- Please provide a copy of the letter FROM the State Historic Preservation Officer regarding the SHPO opinion about impact to or effect on historic properties at this/these tower location/s.
- Please provide a copy of the summary of archaeological methods and findings for this/these tower location/s.
- Please provide the \$50 per tower research fee (\$40 for towers numbered 10682 and lower). This fee is not charged for determining our initial interest in consulting; rather, it covers the research that we subsequently conduct to address concerns about the existence of sites that may be culturally significant to this Tribe.
- We have included, as part of this fax, a copy of our Section 106 of the National Historic Preservation Act consultation procedures for cell tower sites. Please follow these procedures so that we might complete the consultation process in a timely fashion.

RE: AmerenUE Proposed Transmission Line Corridor
Informational Correspondence

To Whom It May Concern:

Aya, kikwesitoole. My name is Joshua Sutterfield and I am the Tribal Historic Preservation Officer for the Federally Recognized Miami Tribe of Oklahoma. In this capacity I am the Miami Nation's point of contact for all NAGPRA and Section 106 issues.

In reference to the above mentioned construction project(s), the Miami Nation is not currently aware of existing documentation directly linking specific Miami religious, cultural, or historic sites to the above referenced construction site(s). However, as this site(s) is/are within the contemporary homelands of the Miami Nation, and due to the sites location near an existing historically important site, we request a copy of all Archaeological surveys performed as this project moves forward.

Should any Native American cultural items falling under the Native American Graves Protection and Repatriation Act (NAGPRA) be discovered during the survey work the Miami Nation requests immediate consultation with the appropriate State Historical Society or related entity.

Please mail all documentation to the address listed above. I can be reached by phone at 918-542-1445 or by email at jsutterfield@miamination.com.

Sincerely,

Joshua Sutterfield
Tribal Historic Preservation Officer
Miami Nation

**AMERENUE PROPOSED TRANSMISSION LINE CORRIDOR
REQUEST FOR ADDITIONAL INFORMATION**

Dear Dr. Hunter:

AmerenUE has received from Paul C. Rizzo Associates, your communication requesting notification of significant findings or copies of reports that may be prepared for our proposed transmission line corridor. I would like to thank you for your response; it was very beneficial in allowing AmerenUE to complete our application for a potential new power plant. Plans are still in the early development stage for the expanded transmission line corridor that would be required should a second generating unit be constructed at the AmerenUE Callaway Plant site near Reform, MO. The decision as to whether or not to proceed with the project is currently planned to be made sometime in early 2011.

AmerenUE will prepare a monitoring and/or study plan that will be reviewed and approved by the Missouri State Historical Preservation Officer (SHPO) prior to implementation of this project. That plan will require that the SHPO be notified of any significant archaeological or cultural resource findings during investigation or construction activities. While our evaluation thus far suggests that any impacts will be small, should there be a potential for significant impacts, then we will consult with the SHPO further regarding appropriate mitigation measures. The Missouri SHPO will then make any necessary appropriate contacts in accordance with their regulations.

A final report will be prepared and submitted to the SHPO should the project proceed. If you wish to obtain copies of any relevant reports, you may contact the SHPO office directly.

If you have any questions, or you would like to speak with a representative of AmerenUE at the site regarding this request, you may contact Mr. Tom Grothe, PE, at (573) 676-8506.

Sent: Thursday, July 10, 2008 3:05 PM
To: Melissa Dubinsky
Subject: Project: AmerenUE Callaway Plant near Reform, MO
Importance: High

On behalf of Steve Ortiz, Tribal Chairman, of the Prairie Band Potawatomi Nation, I am writing to inform you that we have received your National Historic Preservation Act (NHPAS), Section 106 and Section 100, correspondence for the following project(s):

Project: AmerenUE Callaway Plant near Reform, MO

After reviewing the contents of your correspondence, we are unaware of any historical cultural resources in the proposed development area. However, we do request to be immediately contacted if any inadvertent discoveries are uncovered at anytime throughout the various phases of the pending project.

Please feel free to call our Tribal Chairman, Steve Ortiz at (785) 966-4007, or additional information can be faxed to him at (785) 966-4009. Steve is also our NAGPA representative, please correct your records to reflect this if you have another name listed.

We look forward working with you.

Thank you

AMERENUE PROPOSED TRANSMISSION LINE CORRIDOR
INFORMATIONAL CORRESPONDENCE

Dear Mr. Wickliffe and Ms. Stopp:

Paul C. Rizzo Associates, Inc., (RIZZO) has been retained by AmerenUE to assist in the development of the expanded transmission line corridor as may be required for a potential second generating unit at the AmerenUE Callaway Plant near Reform, MO. The enclosed Figure shows the probable route of the new transmission line. As part of the application process, AmerenUE is required to describe the impacts to the environment and to address the potential construction and operating impacts of a new transmission line.

As part of the assessment, RIZZO is evaluating the impacts of the potential project on the historic properties of the area. This letter invites you to request additional information from AmerenUE regarding the temporary and permanent aspects of the potential project, and to provide your views on the potential impacts on issues of interest to your United Keetoowah Band of Cherokee Indians of Oklahoma.

The results of our evaluations supplemented with input from interested parties will be used to develop a monitoring plan or study plan, if necessary, for management of potential historic properties within the impacted area. While our evaluation thus far suggests that any impacts will be small, should there be a potential for significant impacts, then AmerenUE will develop appropriate mitigation measures.

If you have any questions or would like further information, please contact me at (412) 856-9700 x 1009. Additionally, if you would like to speak with a representative of AmerenUE regarding this request, you may contact Mr. Tom Grothe, PE, at (573) 676-8506.

Sincerely,
Paul C. Rizzo Associates, Inc.

**AMERENUE PROPOSED TRANSMISSION LINE CORRIDOR
REQUEST FOR ADDITIONAL INFORMATION**

Dear Mr. Goulden:

AmerenUE has received from Paul C. Rizzo Associates, your communication requesting notification of significant findings or copies of reports that may be prepared for our proposed transmission line corridor. I would like to thank you for your response; it was very beneficial in allowing AmerenUE to complete our application for a potential new power plant. Plans are still in the early development stage for the expanded transmission line corridor that would be required should a second generating unit be constructed at the AmerenUE Callaway Plant site near Reform, MO. The decision as to whether or not to proceed with the project is currently planned to be made sometime in early 2011.

AmerenUE will prepare a monitoring and/or study plan that will be reviewed and approved by the Missouri State Historical Preservation Officer (SHPO) prior to implementation of this project. That plan will require that the SHPO be notified of any significant archaeological or cultural resource findings during investigation or construction activities. While our evaluation thus far suggests that any impacts will be small, should there be a potential for significant impacts, then we will consult with the SHPO further regarding appropriate mitigation measures. The Missouri SHPO will then make any necessary appropriate contacts in accordance with their regulations.

A final report will be prepared and submitted to the SHPO should the project proceed. If you wish to obtain copies of any relevant reports, you may contact the SHPO office directly.

If you have any questions, or you would like to speak with a representative of AmerenUE at the site regarding this request, you may contact Mr. Tom Grothe, PE, at (573) 676-8506.

**AmerenUE Callaway Unit 2
Public Outreach Program
Sample Script for Telephone Call
(See Checklist on Page 4)**

Hello, my name is _____ and I am calling on behalf of AmerenUE to discuss with you AmerenUE's plans to file an application for the potential construction of a nuclear power plant in Missouri.

AmerenUE has not decided whether to build a second plant; however, they have begun to prepare an application for the Nuclear Regulatory Commission. The application is a multi-year process, and requires many steps before Ameren will have enough information with which to decide whether to build a new nuclear power plant.

The purpose of my call is to describe to you the types of information we would like to obtain regarding the communities in the vicinity of AmerenUE's Callaway plant. It will take about 10 minutes to describe the purpose of the call, and somewhat more than that to fully discuss with you all of the issues that may potentially affect the community. Would you like to continue the call at this time or could I arrange another time to speak with you?

Thank you very much for your time. I will call you back at _____.

Goodbye.

WHEN THE CONTACT IS PREPARED TO SPEAK AT LENGTH:

If a call at a new time, review the material from the initial call, and embark on a two-way discussion using the following questions as talking points:

1. This area in {Fulton, Columbia, etc., as appropriate} has been identified as having a significant population of minorities and low income individuals as compared to other areas in central Missouri.
2. AmerenUE is interested in learning more about the community in your area and understanding whether the community has any special concerns about building a new nuclear power plant in Missouri. For the next several minutes, I will ask you a number of questions to better address these two points.
3. For example, how would you generally describe the population in your immediate area – with respect to the age of the population, general health, education level, employment?

4. How would you describe the family structure – how large are average family units?
5. Are there any particular health concerns in the community that seem to occur in the community but not outside the community?
6. What do you think seems to be the source of these health issues?
7. Are there any customs or practices that depend on having access to the Reform Conservation Area or the Missouri River near the Plant?
8. How do you, yourself, generally interact with the local community?

(Note: looking for professional relationship of the contact to the community, to determine if he/she interacts with a broad spectrum of the community or a limited subset.)

9. Are you familiar with the Callaway Nuclear Power Plant? How do you come by that knowledge?
10. For the community you represent, how many people do you think are familiar with the Callaway Plant?
11. Does the community have any interaction with the plant? If so, what type?
12. Do people in your community work there? What percentage of the workforce?
13. Do people in your community ever visit near the Callaway Plant, such as the Reform Conservation Area? If so, do they visit in order to hunt? How often?
14. Do people in your community fish in the Missouri River? If so, do they fish near the Plant? Is there any particular reason that draws them to their favorite fishing hole near the Plant?
15. Has the community ever voiced any concerns about the currently operating plant? If so, what are their concerns?
16. How do you think the community would feel about a second nuclear power plant in the same location as the current plant – on AmerenUE's existing property?
17. Have any concerns been expressed to you about a new plant that could be planned for anywhere in Missouri?

18. What benefits do you think there might be for Missouri, and for your community, if a new nuclear power plant would be built?
19. Thank you. I believe that this completes my questions at the current time. Could you suggest anyone else who would be a good representative to speak to us of the concerns of the minority or low income communities in your area?
20. We would like to mention that the Nuclear Regulatory Commission will be holding public hearings over the next year to provide an opportunity for the public to speak about the prospect of a new power plant. You will have an opportunity to contact them directly.
21. In the meantime, if you have any questions or would like to provide additional information, you can contact me directly. I will send you a letter confirming that we have had this telephone conversation and providing you with contact information for AmerenUE. Let me confirm your address as follows: -----
-.
22. Thank you again, on behalf of AmerenUE, for taking the time to speak with me.
23. Goodbye.

**AmerenUE Callaway Unit 1
Public Outreach Program
Checklist for Communications with Contacts
(Note: expect these to be anecdotal responses)**

<input type="checkbox"/>	Has a written record of this communication been prepared? In the written record, ensure the following is provided:
<input type="checkbox"/>	1. Name, title, address, phone and email of contact.
<input type="checkbox"/>	2. Description of the community being discussed, <i>specifically</i> :
<input type="checkbox"/>	a. Minority Status
<input type="checkbox"/>	b. Age (i.e., average age, age range)
<input type="checkbox"/>	c. Family status (number of individuals in a family unit, on average or predominantly)
<input type="checkbox"/>	3. Income status (low income, rough percentage that are on public assistance, unemployment, etc.)
<input type="checkbox"/>	4. Health status (particular or unique health concerns, pre-existing health conditions)
<input type="checkbox"/>	5. Fishing habits (near the Plant –Missouri River or Reform Conservation Area)
<input type="checkbox"/>	6. Hunting or farming on Reform (other recreation?)
<input type="checkbox"/>	7. Subsistence living using Reform or Missouri River as major source of food
<input type="checkbox"/>	8. Customs or practices that depend on access to Missouri River near the Plant or Reform (social, human health, or economic)
<input type="checkbox"/>	9. Familiarity with Callaway Plant – describe details
<input type="checkbox"/>	10. Working at the Plant – how many of the community work there
<input type="checkbox"/>	11. Any particular concerns about a possible new nuclear unit
<input type="checkbox"/>	12. Any identified benefits of a possible new nuclear unit

CONTACT NAME Andrea Hunter OF Osage Tribe

TELEPHONE NO. (918) 287-5671

She is sending us a letter asking to see the report of the cultural resources survey that was done. I explained that Ameren was planning to build a new transmission line adjacent to the current line, and that was to support a new power plant that was to be built on currently disturbed property. I explained that with the new plant a collector well system was to be installed and I explained the structure of the collector well system.

I explained the CR work we had done for the collector wells and offered to send a copy of that report, but that we were not intending to survey the collector well system ~~until~~ for a couple of years, until the location of the poles was known.

Dr. Hunter asked that we just hold the letter as pending until such time as we do the work, and to send us the report that we currently have.

ACTION TO BE TAKEN Send copy of final CR report on collector wells and discharge line.
When transmission corridor work done, send her a copy of that

MEETING MEMORANDUM

DATE:	04-22-2008
LOCATION:	Ameren Office in Jefferson City, MO
FROM:	Steve Stumne
SUBJECT:	SHPO Meeting
TO:	Melissa Dubinsky, Pat Cryderman, Tom Grothe
ATTENDEES:	MDNR SHPO: Judith Deel Ameren: Pat Cryderman, Tom Grothe MACTEC: Steve Stumne, Emmett Brown Rizzo: Cliff Merchant

Summary of Meeting Content

On Tuesday April 22, 2008 a meeting was held with Judith Deel of the State Historic Preservation Office to discuss on-going and future cultural resources work at the Callaway Nuclear Power Plant as it relates to the Unit 2 COLA. Key elements of the meeting are as follows:

1. Pat questioned the necessity of a survey on the entire bluff (requested by SHPO at a previous meeting) since the 150' wide transmission line corridor is the only planned construction zone in the bluff area. Judith gave the following reasons for making the recommendation:
 - a. As the lead federal agency, the NRC has defined the APE as the entire Ameren property;
 - b. The previous study from the early 1980's used older methodology and a new survey would likely provide better information;
 - c. General tribal interest; and
 - d. Specific interest from the Osage tribe who is interested in burial sites.
2. Judith confirmed that a bluff survey on Ameren property would be the recommendation from the SHPO to the NRC. Scope is to include verifying locations and delineating boundaries of previously identified sites and a new survey of the bluff based on 15-m shovel test intervals.
3. Judith said she would not be surprised if Dr. Andrea Hunter (new Osage Tribal Historic Preservation Officer) brought a few tribal elders out to the Callaway NPP site for a tour of the bluff area.
4. Because the tribes are considered sovereign nations, it is the NRC's responsibility as the lead federal agency to correspond with tribes.

5. Judith also said that MDC has the potential via management operations on the Reform Conservation Area to disturb potentially eligible sites on the bluff area. SHPO has been coordinating with MDC about this issue.
6. Discussed the potential for relinquishing ownership of the bluff area to MDC to minimize property held by Ameren and thus eliminate the need for a bluff survey. Pat said the Unit 2 COLA schedule would not accommodate this strategy.
7. Ameren will discuss with NRC the SHPO recommendation for a bluff survey. Ameren to determine if this work needs to be done now for inclusion in the ER. Pat said MACTEC would know by the end of this week (04-25) if the bluff survey needed to be included in the ER submittal.
8. MACTEC to review their cost proposal and be ready to start when called upon.
9. Discussed the schedule for transmission line CR surveys. Work will be delayed until after design and siting of the support towers which could be two or more years away.
10. Emmett gave an update on the shovel testing in the collector well access road corridor within the floodplain of the Missouri River. Work started on Monday 04-21-2008 and should be completed no later than the middle of next week. Current SOW only includes shovel testing but will be modified to include deep testing.
 - a. The group concluded that a geo-probe is the preferred method of deep testing.
 - b. Judith said the geo-probe should investigate 15-20 feet below ground surface where deep testing is required (near shipwreck location and near Logan Creek).
 - c. If a shipwreck is discovered but is below our zone of impact, SHPO considers this preservation in place and no additional studies would be required.
11. Pat asked about CR clearance of the bridge piers for the Mollie Dozier Chute crossing. We should survey the vicinity of the piers with the geo-probe while we are mobilized to do the work. MACTEC should include this in the scope modification for deep testing.
12. Emmett will write a letter to SHPO documenting that site 256 is not eligible and does not require any further study. Site 256 is located near P-5 within the planned construction zone for Unit 2.

engineering and constructing a better tomorrow

Subject: **Report of Phase I Archaeological Survey
Selected Portions of an Access Road/Pipeline Corridor
and Transmission Line Corridor
Callaway and Osage Counties, Missouri
MACTEC Project 3250-07-5219-23.11**

Dear Mr. Miles:

Please find enclosed two copies of our report *Report of Phase I Archaeological Survey, Selected Portions of an Access Road/Pipeline Corridor and Transmission Line Corridor, Callaway and Osage Counties, Missouri* on behalf of Paul C. Rizzo & Associates and AmerenUE for your review. The purpose of our survey was to determine if significant cultural resources were located within the proposed location at certain on the proposed access road/pipeline and transmission corridor at the Callaway Plant in Callaway County, Missouri.

If you have any questions please feel free to call Emmett Brown (865) 218-1984.

Sincerely,

MACTEC Engineering and Consulting, Inc.

Re: Blowdown Discharge Pipeline, Callaway Nuclear Power Plant (NRC & FERC) Callaway County, Missouri

Dear Mr. Brown:

Thank you for submitting information on the above referenced project for our review pursuant to Section 106 of the National Historic Preservation Act (P.L. 89-665, as amended) and the Advisory Council on Historic Preservation's regulation 36 CFR Part 800, which requires identification and evaluation of cultural resources.

We have reviewed the August 2007 report entitled *Management Summary, Phase I Archaeological Survey, Blowdown Discharge Pipeline, Callaway Nuclear Plant, Callaway County, Missouri*. Based on this review it is evident that a thorough and adequate cultural resources survey has been conducted of the project area. We concur with your recommendation that archaeological site 23CY352, a property that may be eligible for inclusion in the National Register of Historic Places, is outside of the project corridor. There will be **no adverse effect** and we have no objections to the initiation of project related activities, on the condition that a final report documenting the results of the survey are submitted to this office within six (6) months.

Please be advised that, should project plans change, information documenting the revisions should be submitted to this office for further review. In the event that cultural materials are encountered during project activities, all construction should be halted, and this office notified as soon as possible in order to determine the appropriate course of action.

If you have any questions, please write Judith Deel at State Historic Preservation Office, P.O. Box 176, Jefferson City, Missouri 65102 or call 573/751-7862. Please be sure to include the SHPO Log Number (**005-CY-07**) on all future correspondence or inquiries relating to this project.

Sincerely,

STATE HISTORIC PRESERVATION OFFICE

Re: AmerenUE COLA Monitoring Project (NRC) Callaway County, Missouri

Dear Ms. Houghton:

Thank you for submitting information on the above referenced project for our review pursuant to Section 106 of the National Historic Preservation Act (P.L. 89-665, as amended) and the Advisory Council on Historic Preservation's regulation 36 CFR Part 800, which requires identification and evaluation of cultural resources.

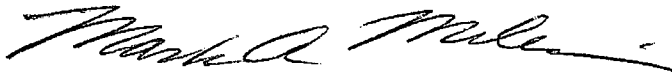

We have reviewed the Section 106 Survey Memo entitled *Ameren UE COLA Test Wells, Callaway County, Missouri*. Based on this review it is evident that a thorough and adequate cultural resources monitoring has been conducted of the test wells project area. We concur with your recommendation that there were **no historic properties affected**. We have no objection to the initiation of project activities.

Please be advised that, should project plans change, information documenting the revisions should be submitted to this office for further review. In the event that cultural materials are encountered during project activities, all construction should be halted, and this office notified as soon as possible in order to determine the appropriate course of action.

If you have any questions, please write Judith Deel at State Historic Preservation Office, P.O. Box 176, Jefferson City, Missouri 65102 or call 573/751-7862. Please be sure to include the SHPO Log Number **(003-CY-08)** on all future correspondence or inquiries relating to this project.

Sincerely,

Re: Access Road & Pipeline Corridor, Callaway Nuclear Power Plant (NRC) Callawat County,
Missouri

Dear Ms. Dubinsky:

Thank you for submitting information on the above referenced project for our review pursuant to Section 106 of the National Historic Preservation Act (P.L. 89-665, as amended) and the Advisory Council on Historic Preservation's regulation 36 CFR Part 800, which requires identification and evaluation of cultural resources.

We have reviewed the July 2008 draft report entitled *Phase I Archaeological Survey, Access Road and Pipeline Corridor, Callaway County, Missouri* by MACTEC. Based on this review it is evident that a thorough and adequate cultural resources survey has been conducted of the project area. We concur with the investigator's recommendation additional deep testing should be undertaken in the Logan Creek area where a burial Middle Archaic horizon has been identified, in order to confirm if there are archaeological sites present.

Please be advised that, should project plans change, information documenting the revisions should be submitted to this office for further review. In the event that cultural materials are encountered during project activities, all construction should be halted, and this office notified as soon as possible in order to determine the appropriate course of action.

If you have any questions, please write Judith Deel at State Historic Preservation Office, P.O. Box 176, Jefferson City, Missouri 65102 or call 573/751-7862. Please be sure to include the SHPO Log Number (003-CY-08) on all future correspondence or inquiries relating to this project.

Sincerely,

STATE HISTORIC PRESERVATION OFFICE
