Subject: COMANCHE PEAK geology audit

Don,

Thanks for your call this morning. Next week we will send you the information needs. The plan for Monday is to look at core samples and go over the site safety issues. Tuesday, July 28, 2009 conduct site and offsite tours. The public meeting would occur on Wednesday July 29 from 10 to noon on 2.5.1 and 2.5.3, from 3 pm to 4 pm on 2.5.2.

On Thursday July 30, 2009, we would have our last public meeting to discuss 2.5.4 and 2.5.5 from 10 am to 1130 am.

I will take care of the meeting notice and meeting summary.

Of course, the NRC would answer all questions from the public and, likewise, the NRC staff understands that Luminant is not obligated to answer any questions from the public.

thanks,

Stephen Monarque
