As we discussed in February this year, we have been conducting a Technical Analysis to determine under what conditions DU can be safely disposed of in a near surface disposal facility. We would like to share with you some preliminary findings of our analysis and also hear any updates from you about this issue in your States.

I would like to schedule a call for June 3 at 11 am EST. Hopefully that will work for those of us a few hours behind. Please let me know if someone from your office will be available. After everyone confirms, I can set up a call-in #.
