Dane,

Do you have access to or can you request that Energy Solutions give us the Whetstone 2000a, 2000b reports referenced in the memo that you sent me (attached)?

Priya Yadav, PE

Project Manager

Division of Waste Management and Environmental Protection

US Nuclear Regulatory Commission

301-415-6667 (phone)

301-415-5370 (fax)

Good, I thought Lorin and John might have some good questions for Dave Esh. Did you get an update from Christine Gelles on where they are at with their DUF6 facilities and the timeline for when they will have the conversion product?

Texas CEQ requested that we have a more technical discussion on the model that we used for our technical analysis. This call will be on July 1 at 10 am EST. I wanted to invite all of you, in case you would like to call in with your technical staff and ask detailed questions. The call in information is below. Please let me know if you plan to call in.

CALL DATE: JUL-01-2008 (Tuesday) CALL TIME: 10:00 AM EASTERN TIME  
DURATION: 1 hr 30 min

DIAL-IN NUMBERS: 888-889-1954

PARTICIPANT PASSCODE: [ (b)(2)High ]

As we discussed in February this year, we have been conducting a Technical Analysis to determine under what conditions DU can be safely disposed of in a near surface disposal facility. We would like to share with you

some preliminary findings of our analysis and also hear any updates from you about this issue in your States. I would like to schedule a call for June 3 at 11 am EST. Hopefully that will work for those of us a few hours behind. Please let me know if someone from your office will be available. After everyone confirms, I can set up a call-in #.
