**OC LRI Outage Commitments Inspection
Day 8 (Tuesday - Election Day)**

Schedule Change for Exit Meeting

Thursday, Nov 6 On-site Debrief at 10 AM
Monday, Nov-10 Telephonic Exit Meeting, from Region [time to be determined]

Drywell Structural Integrity Issues or Concerns

1) Sand Bed Bay-11 (exterior drywell shell) has a small coating defect. A detailed Repair Plan is under development. Repair work might start tomorrow (optimistic).

Inspection Progress

1) Progress remains *painfully* Slow. Drywell NDE activities still behind schedule, and their starting to talk about drywell closeout.

Today's Inspection Activities

1) Reviewed electrical cable test results for Aux Transformer feeder cable (inaccessible medium voltage cable).

LR Commitment Issues or Concerns

(b)(5)

EX-15

NJ State Interface

Remains Good. Rich Pinney seems satisfied. Interestingly enough, Rich continues to say that he believes there is no active (on-going) drywell shell corrosion, but he also seems worried that Exelon's monitoring of the drywell may be insufficient.

Team Location: OCAB 2nd Floor, Visiting Exec Office, 609-971-4830

L/5
