**OC LRI Outage Commitments Inspection
Day 9 (Wednesday)**

Darrell Roberts and Rich Conte were on-site today.

Schedule Change for Exit Meeting

Thursday, Nov 6 will be a normal end-of-day Debrief at 4 PM
Monday, Nov-10 Telephonic Exit Meeting, from Region [time to be determined]

Drywell Structural Integrity Issues or Concerns

1) Repairs started for Sand Bed Bay-11 (exterior drywell shell). Within a small area, 4 distinct rust spots were exposed during excavation of 1 loose blister.
SEE SEPARATE E-MAIL FOR DETAILS

Inspection Progress

1) Progress remains *painfully* Slow. Most of the NDE UT data, needed for our independent review is expected to be available tomorrow.

Today's Inspection Activities

1) Observed in-progress coating repairs in Bay-11.

LR Commitment Issues or Concerns

(b)(5)

NJ State Interface

Remains Good. Rich Pinney seems satisfied. Interestingly enough, Rich continues to say that he believes there is no active (on-going) drywell shell corrosion, but he also seems worried that Exelon's monitoring of the drywell may be insufficient. Ron Zak agrees that a 1/4 inch diameter of rust has no impact on the structural integrity of the drywell, but still seems to believe the existing coating is not acceptable. Both Rich and Ron think AmerGen should be REQUIRED to do a 100% coating inspection every outage.

Team Location: OCAB 2nd Floor, Visiting Exec Office, 609-971-4830
