Thank you, Norman.

Per our conversation, the scoping period for the Levy project ended on December 23, 2008. However, I will send the information on to our technical people for their consideration. The next opportunity for public comment will be on the Draft Environmental Impact Statement, which is currently scheduled for release towards the end of October.

Sincerely,

Doug Bruner

Douglas,

I have added information to the Foundation's website at www.amyhrf.org

Go to Education Section - Coastal Rivers - Crystal River (under Tributary Flows). Progress Energy released a site map showing E - W piezometric flows across the site. Where such flows intersect with a southward flowing conduit to the west, as suggested by the research , it would change direction to the south.

Other pages showing similar research are at:

Education Section - Aquifers - Geology and, - Citrus County - Fractures sets Example

I hope this helps. Norn
