**Subject:** summary of call with Powder River Basin Resource Council

I called Shannon Anderson of the Powder River Basin Resource Council (PRBRC) today. The main purpose of my call was to find out if she had any additional information to help us in our environmental reviews of the Nichols Ranch, Moore Ranch, and Lost Creek ISR applications. The PRBRC provided comments on the Nichols Ranch ISR application in a letter dated June 19, 2008; however, no comments were provided on the Moore Ranch or Lost Creek ISR applications. I provided this letter to Environet at the start of the review.

Shannon stated that they are most interested in the Nichols Ranch ISR application as one of their members is a landowner within the proposed Nichols Ranch project area. She had no additional comments beyond those stated in the June 2008 letter although she did indicate that those comments would likely pertain to the Moore Ranch ISR application review. She also indicated two additional organizations that she thought had submitted comments on the GEIS and might have comments on the three specific projects. Those two groups and a summary of their comments are as follows:

Biodiversity Conservation Alliance  
Laramie, WY  
contact: Wayne Prindle, 307-742-7978  
GEIS comments: concerned with wildlife impacts (big game, sage grouse) and wild land and landscape impacts (from

Wyoming Outdoor Council  
Lander, WY  
contacts: Bruce Penderey or Steve Jones  
GEIS comments: comments were generic and pertained only to the GEIS

Based on the information provided, we will take the following action items:

- I will provide Behram a copy of the PRBRC letter from June 2008 and he will make sure that the contractor is aware that these comments for Nichols Ranch also apply to Moore Ranch.
- As the two additional public interest groups are located near Lost Creek, Alan has called the two groups to find out if they have any comments/concerns regarding these three sites.
