Yes, the answer provided by the applicant is fine, with one comment. The text discusses temperatures and the two Ecology III plume studies were provided as requested. Part of the original RAI about ER text versus figure differences was answered during the audit when the applicant's modelers explained that the contours shown in the figures indicated where the plume surfaces. Note that the modeler told me that the ER was "incomplete" and that the next version would correct that. Nonetheless, the explanation provided in the audit allows me to understand the provided text and figures so the RAI about the differences is not necessary.

Roy, One more question. Just to be clear, is this the RAI we can delete in response to AE-A on your table?

Explain the differences in the discharge plume modeling results shown in the ER for BBNPP and SSES winter and summer plumes.

Discuss the apparent differences between the ER text, table, and figures regarding the discharge plume temperatures.

Hi Stacy!

Yes, that RAI is no longer necessary. UniStar provided some text about the relocation and provided a figure that shows the new location in relation to the existing one.

Roy- Just to be clear, is this the RAI you suggest deleting in response to AE25 on your table?

Provide information about the relocation of a section of the ditch draining the Canal into the Susquehanna River, specifically

- the location of the ditch
- the methods used to construct the relocated section of the ditch

- the features that would be incorporated in the “natural stream” design for the reconstruction,
- potential post-relocation monitoring of the reconstructed ditch.

Bruce- I have seen input from Robin, Jim, and Lara on this...did you see anything else?

Guys- let me/Bruce know if what was submitted in Enclosure 2 fulfills the need of the RIA listed in the last column of the table...Stacey wants to know if she can delete any of the RAIs.

Thanks,

K

[NRC - EARRTH](#)

ACTION: review MORE info submit... has been added

Title: ACTION: review MORE info submitted by PPL by Tue 7/7 COB

Body: [Marty, Dick, Robin, Roy, Michael, Jim, Lara and Bill](#)- PPL submitted more info prior to the RAIs (they call it Enclosure 2). I have uploaded all the info <https://earth.pnl.gov/Site%20Documents/COL%20Sites/Bell%20Bend/02%20Reference%20Documents/00d%20Files%20from%20PPL%20prior%20>

Stacey requested that you review this information to make sure it adequately fits the need of the RAI. If it does, she would like to delete the RAI. [Op](#) a table that lists out all the items in Enclosure 2. Stacey attempted to determine which RAI could possible be deleted in [column 5 of the attached file](#) if the information submitted in Enclosure 2 meets the need of the RAI and if it can be deleted by Tues 7/7 COB. We apologize for the rush on this, but RAIs through her concurrence chain ASAP. Let Bruce or I know if you have any questions.

[Patrick, Tom, Jeremy, Tim, Adrian](#)- you have no action on this item, as PPL didn't submit anything in your areas!

Thanks-K
