PURPOSE: Luminant Generation Company LLC (Luminant) intends to submit in the near future a request for a one-time license amendment to revise Technical Specification 3.8.1, "AC Sources – Operating" for Comanche Peak Steam Electric Station, Units 1 and 2. The change is needed in order to facilitate the installation of a planned plant modification, which would provide the capability to connect a spare offsite source transformer to the onsite Class 1E busses within the existing limiting condition for operation required action completion time. Luminant would like to discuss the planned modification with U.S. Nuclear Regulatory Commission (NRC) staff during the pre-application meeting to receive early NRC staff feedback.

CATEGORY:\* This is a Category 1 meeting via conference call. The public is invited to participate in this meeting and will have one or more opportunities to communicate with the NRC after the business portion, but before the meeting is adjourned.
