Re: Freedom of Information Act Request

Dear Madam or Sir:

This is a Freedom of Information Act ("FOIA") request submitted pursuant to 10 C.F.R. 9.23. This request pertains to information the Nuclear Regulatory Commission may possess on AREVA Federal Services, LLC design of a new research reactor spent fuel cask for Battelle Energy Alliance (the "AREVA/BEA cask"). Specifically, we request copies of the following materials:

1. Any and all correspondence, documents, memoranda, records of teleconferences, electronic mails, and other materials related to the AREVA/BEA cask that were submitted or created subsequent to July 18, 2008.
2. Any and all correspondence, documents, memoranda, records of teleconferences, electronic mails, and other materials related to communications between Battelle Energy Alliance and the NRC staff concerning the design of a new research reactor spent fuel cask that were submitted or created subsequent to July 18, 2008.

This FOIA request serves as a follow-up to a June 25, 2008 FOIA request, FOIA/PA-2008-02<sup>6</sup>35, which the NRC responded to on July 18, 2008. We are specifically looking for any material that may have been generated subsequent to the NRC's July 18, 2008 response.

We would appreciate your prompt response within ten working days of the receipt of this request, as provided by NRC regulation. To expedite your response, you may provide partial responses when relevant information has been collected. We agree to pay such fees as required under 10 C.F.R. 9.33; however, please contact us if costs will exceed \$500 or if you have any questions.

Sincerely,

Jon Opdyke
