Docket No. 03035166
Control No. 143894

License No. 07-30527-01

A. Neal DeSanctis, Jr., M.D.
President
Delaware Cardiology, LLC
2101 Foulk Road
Wilmington, DE 19810

SUBJECT: DELAWARE CARDIOLOGY, LLC, REQUEST FOR ADDITIONAL
INFORMATION CONCERNING APPLICATION FOR RENEWAL OF LICENSE,
CONTROL NO. 143894

Dear Dr. DeSanctis:

This is in reference to your application dated June 17, 2009 requesting to renew Nuclear Regulatory Commission License No. 07-30527-01. In order to continue our review, we need the following additional

1. Please confirm that you will develop, implement and maintain written procedures for safe response to spills of licensed material in accordance with 10 Part 20.1101.
2. In your application you committed to establishing and implementing many of the Model Procedures published in NRC Regulatory Guide 10.8, Revision 2, "Guide for the Preparation of Applications for Medical Use Programs." This guide was published in August 1987 and was designed for use with the NRC's medical regulations that existed in 10 CFR Part 35 at that time. On April 24, 2002, NRC published new medical regulations in 10 CFR Part 35. These regulations became effective on October 24, 2002. Concurrent with the issuance of the new medical regulations, NRC published NUREG-1556, Volume 9, "Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Medical Use Licenses". As specified in Appendix AA of NUREG-1556, Volume 9, Regulatory Guide 10.8, Revision 2 is superseded and should no longer be used. Therefore, in your renewal application, the references to Regulatory Guide 10.8, Revision 2 are not applicable.

If you choose, you may use NUREG-1556, Volume 9, in preparing your license renewal application. You will note that new Part 35 and this guidance generally do not require the submission of detailed procedures during the licensing process. As detailed in NUREG-1556, Vol. 9, in many cases a licensee is required only to supply a statement regarding the development, implementation, and maintenance of written operating and emergency procedures. Appendix C of NUREG-1556, Volume 9, should be helpful in identifying the information required by NRC to process your request for license renewal. You can find NUREG-1556, Volume 9 on the NRC website using the following link:
<http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v9/r2/>.

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Medical, Academic, and Industrial Uses of Nuclear Material**; then **Regulations, Guidance, and Communications**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 7:00 a.m. to 6:30 p.m. EST, Monday through Friday (except Federal holidays).

We will continue our review upon receipt of this information. Please reply to my attention at the Region I Office and refer to Mail Control No. 143894. If you have any technical questions regarding this deficiency letter, please call Maisha Murry at (610) 337-5376.

In order to continue prompt review of your application, we request that you submit your response to this letter within 30 calendar days from the date of this letter.

Sincerely,

Original signed by Farrah C. Gaskins
