MFN 09-234 Supplement 1  
July 24, 2009

U.S. Nuclear Regulatory Commission  
Document Control Desk  
Washington, D.C. 20555-0001

**Subject:** Correction to Proprietary Determination for Draft Safety Evaluation (SE) of GE-Hitachi Nuclear Energy Americas, LLC (GEH) Licensing Topical Report (LTR) NEDE-32906P, Supplement 3, "Migration to TRACG04/PANAC11 from TRACG02/PANAC10 for TRACG AOO and ATWS Overpressure Transients" (TAC No. MD2569)

In Reference 1, GEH provided a proprietary determination of the draft Safety Evaluation (SE) of the subject topical report. In that transmittal it was indicated that there was no proprietary content in Appendix D of that SE. Subsequently, it has come to our attention that there is one instance of proprietary information in Appendix D that was not identified. Enclosure 1 contains Appendix D of the SE with the proprietary content redacted.

If you have any questions, please contact Ed Schrull at (910) 819-5744 or me.

Sincerely,

James F. Harrison  
Vice President, Fuel Licensing  
Regulatory Affairs  
GE-Hitachi Nuclear Energy Americas LLC

Project No. 710
