VIRGINIA ELECTRIC AND POWER COMPANY (DOMINION)
NORTH ANNA POWER STATION UNIT 1
WITHDRAWAL OF RELIEF REQUEST NDE-003
FOR THE FOURTH INTERVAL ISI PROGRAM

In a letter dated October 17, 2008 (Serial No. 08-0595), Dominion submitted the North Anna Power Station Unit 1 inservice inspection (ISI) program for the fourth inservice inspection (ISI) interval. The ISI Plan described the programmatic aspects of ISI examinations applicable to Class 1, 2, and 3 components and component supports. Included with the program were requests for alternatives or relief from the specific code requirements in accordance with 10 CFR 50.55a(a)(3)(i) and/or (ii) or 10 CFR 50.55a(g)(5)(iii).

During a recent review of the Unit 1 fourth interval plan in preparation for a Unit 2 submittal, several administrative omissions and errors were identified in the submitted Unit 1 Relief Request NDE-003. The errors significantly affect the basis of the relief request. Therefore, Dominion is withdrawing Relief Request NDE-003 at this time. Following an assessment of how these events occurred, Dominion plans to revise Relief Request NDE-003 and resubmit for NRC review and approval. We apologize for any inconvenience this may have caused.

If you have any questions or require additional information, please contact Mr. Thomas Shaub at (804) 273-2763.

Sincerely,

J. A. Price
Vice President – Nuclear Engineering
