NRC SEEKS INPUT ON PROPOSED RULE REVISIONS TO THE ENVIRONMENTAL PROTECTION REGULATIONS AND REVISED GENERIC ENVIRONMENTAL IMPACT STATEMENT FOR NUCLEAR PLANT LICENSE RENEWALS

The U.S. Nuclear Regulatory Commission will hold five public meetings in September and October seeking comments on the proposed rule to the environmental protection regulations, specifically the *Summary of Findings on National Environmental Policy Act (NEPA) Issues for License Renewal of Nuclear Power Plants* and the draft revision of *Generic Environmental Impact Statement (GEIS) for License Renewal of Nuclear Plants*, NUREG-1437, originally published in 1996. The deadline for comments to be submitted on these documents is Oct. 14.

The proposed rule revisions redefine the number and scope of environmental impact issues that must be addressed in a nuclear power plant license renewal review. The NRC conducted public scoping meetings and collected comments over the past few years that were considered in the revised GEIS. In addition, knowledge gained and lessons learned from previous license renewal reviews, as well as new information were incorporated in the revision. On a 10-year cycle, the Commission stated it intends to review and update the rule as necessary.

The GEIS assesses the overall scope and impact of environmental effects associated with license renewal at any nuclear power plant site and it improves the efficiency of the license renewal process. Plant-specific supplements to the GEIS are prepared for each license renewal review. The NRC's environmental protection regulations stem from the National Environmental Policy Act (NEPA); which requires an environmental impact statement for major federal actions significantly affecting the quality of the human environment, such as renewing the license of a nuclear plant.

Concurrent with the rulemaking and GEIS revision, the NRC is publishing for public comment, a revised Regulatory Guide 4.2, Supplement 1, *Preparation of Environmental Reports for License Renewal Applications*, and NUREG-1555, Supplement 1, *Standard Review Plans for Environmental Reviews for Nuclear Power Plants*.

The NRC will hold public meetings in Georgia, Massachusetts, California, Illinois and Maryland. At these meetings, the members of the public will have an opportunity to comment on the documents. The NRC staff will be available to answer questions.

In September, the staff will be available to answer questions during an open house prior to each meeting. Each open house will start at 5 p.m. and the public meetings will start at 7 p.m. The October public meeting will start at 1 p.m. and staff will be available to answer questions following this meeting at 5 p.m. The October 1 meeting will be webstreamed to maximize the potential to include interested stakeholders via the NRC's website at: <http://www.nrc.gov/public-involve/public-meetings/webcast-live.html>. No public comments will be taken during the open house and discussion sessions.

The meetings will be held on the following dates and locations:

- Sept. 17: Boston Marriott Newton, 2345 Commonwealth Avenue, Newton, Mass.;
