Discussion Topics

- 1. MCR Modeling (Rajiv Prasad)**
Rajiv explained his needs for modeling results for 2-unit output in addition to the 4-unit output. Also, more characterization of results is needed for river flow, temperature of the river, and total dissolved solids, along with descriptive statistics of those results. Also need to run model for no units operating and with projected flows.
ACTION: NRC/PNNL to draft an RAI and schedule a telecom with STP/Bechtel to ensure Bechtel has the details to run the new cases. Bechtel/STP estimated it would take 10 -15 weeks to run the model and provide the response.
- 2. CORMIX Files from TPDES Permit (Rajiv Prasad)**
PNNL/NRC needs to see the files used by the TCEQ when they ran the mixing models for the STP TPDES permit discharge location. STP provided the TCEQ permit manager's name and contact information so NRC/PNNL could call to request those files.
- 3. Reading Room (Nona Diediker, Russ Kiesling)**
There is no computer available in the Richland, WA reading room.
- 4. Alternatives Analysis (Russ Kiesling)**
STP is actively working with new contractor on analysis.
- 5. US Army Corps Determination Status (Russ Kiesling)**
The Corps is supposed to come out to STP this week.
- 6. SUNSI Request (Jim Biggins)**

Jim gave the current status of the SUNSI request the NRC received.
