

September 2, 2009

Mr. Rick Oxendine, Executive Director
Guilford Native American Association
P.O. Box 5623
Greensboro, N.C. 27435

SUBJECT: REQUEST FOR INFORMATION REGARDING TRIBAL HISTORIC AND
CULTURAL RESOURCES POTENTIALLY AFFECTED BY THE PROPOSED
GENERAL ELECTRIC-HITACHI GLOBAL LASER ENRICHMENT FACILITY
NEAR WILMINGTON, NORTH CAROLINA

Dear Mr. Oxendine:

Thank you for the information you provided to Ms. Christianne Ridge of my staff during a telephone call on August 31, 2009. As you discussed with Ms. Ridge, the U.S. Nuclear Regulatory Commission (NRC) is gathering information regarding Tribal historic sites or cultural resources on a site near Wilmington, North Carolina. On June 26, 2009, General Electric-Hitachi (GEH) submitted an application to the NRC for a license to authorize construction and operation of a uranium enrichment facility. The facility, if licensed, would use a laser-based technology to enrich the isotope uranium-235 in uranium hexafluoride (UF₆) up to 8 percent by weight. GEH proposes to locate the facility on the existing General Electric/Global Nuclear Fuel-Americas site near Wilmington, in New Hanover County, North Carolina (Wilmington site).

As established in Title 10 of the Code of Federal Regulations Part 51 (10 CFR 51), the NRC regulation that implements the National Environmental Policy Act of 1969, as amended, the NRC is preparing an Environmental Impact Statement (EIS) for the proposed action. The EIS will address the impacts associated with the construction, operation, and decommissioning of the proposed facility. As part of the environmental review, the NRC is requesting input from the Guilford Native American Association to facilitate the identification of Tribal historic sites or cultural resources that may be affected by the proposed action. Specifically, the NRC is interested in learning of any areas on the Wilmington site that you believe have traditional religious or cultural significance. Any input you provide will be used to enhance the scope and quality of our review in accordance with 10 CFR 51 and 36 CFR 800, the implementing regulation for Section 106 of the National Historic Preservation Act.

To support the license application, GEH submitted an Environmental Report (ER) that identifies 107 hectares (265 acres) of the 656 hectare (1621 acre) Wilmington site as the area for the construction, operation, and decommissioning of the proposed facility. The ER is publicly available in the NRC Public Document Room located at One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852, or from the NRC's Agencywide Documents Access and Management System (ADAMS). The ADAMS Public Electronic Reading Room is accessible at <http://www.nrc.gov/reading-rm/adams.html>. The accession number for the ER is ML090910573. For your convenience, we have enclosed the applicant's executive summary, as it appears in the ER, to provide you with background information.

R. Oxendine

2

We would appreciate any information you could provide about Tribal historic sites or cultural resources that may be affected by the proposed action. If you have any questions or comments, or need any additional information, please contact Ms. Christianne Ridge by telephone at 301-415-5673 or email at christianne.ridge@nrc.gov

Sincerely,

/RA/
