enhance the security requirements for portable gauges containing byproduct material. This revision became effective July 11, 2005. Revised 10 CFR 30.34 now requires that "each portable gauge licensee shall use a minimum of two independent physical controls that form tangible barriers to secure portable gauges from unauthorized removal, whenever portable gauges are not under the control and constant surveillance of the licensee" (i.e., when not in use). Guidance on these security procedures is provided in revised Appendix H of NUREG-1556, Volume 1, rev. 1 (see attachment). Commit to the following language: "We will implement and maintain the "Operating, Emergency, and Security Procedures" in Appendix H of NUREG-1556, Volume 1, Revision 1, and provide copies of these procedures to all gauge users and at each job site."

S&S will not only be acquiring the gauge, but S&S is also acquiring the system currently used to secure the portable gauge. S&S will be un bolting and moving the system to our storage facility.
