Subject:
Deficiency phone call on
proposed AMP

(NOTE: This will be used as the
Documents Title in ADAMS)

Summary: Discussed two issues regarding the proposed AMP. (1) The correct spelling of his (or her) last name: Ndvloi in letter vs Ndlovu in NRC license, and (2) The license used as reference was terminated in 2003 and was for a Co-60 unit. We need evidence of recentness of T&E with the licensee's GammaMed HDR unit. Dr. Petrone stated that the licensee probably provided the wrong NRC license as reference. He will verify that the proposed AMP is qualified for a GammaMed unit as listed for such on another license or will ensure that he receives the required training. I stressed that due to NJ becoming an Agreement State on 10/1, time was of the essence. He said he will expedite this case as much as he can.

Action Required: Wait for the licensee's response.
