SUBJECT
Control No. 318189 - Re request to change the mailing address due to a new entrance to their reduced office space, from 309 to 305 W. Hillgrove Avenue, LaGrange, IL 60525-5912, for this portable gauge licensee (License No. 12-24867-01), authorized only for temporary job site usage anywhere in the U.S. where the NRC maintains jurisdiction for regulating the use of licensed material.

SUMMARY
In the telephone conversation with Ms. Barrows, the following items were discussed:.

1. I related that we are now required to place on the license as amended, a total possession limit for each radionuclide authorized on the license. Ms. Barrows requested a total possession limit of 88 millicuries of Am-241 to cover their two gauges stating they had no plans for program expansion.
2. I also noted that we would be modifying License Condition 18. in its entirety to incorporate additional security measures for portable gauges based on revisions to 10 CFR part 30 which became effective July 11, 2005. These measures require a minimum of two independent physical controls to secure portable gauges from unauthorized removal whenever the portable gauges are not under the control and constant surveillance of the licensee.
3. I also noted that we would be updating License Condition 14. D. regarding leak testing criteria, to reflect our current standard license conditions.

ACTION REQUIRED
License reviewer to utilize above information in review and evaluation of subject amendment request.
