Thank you; I think we need to stay the course on trying to schedule a "siting" discussion in June and not wait until this decision is made.
We can explore the potential outcomes if appropriate.

Rocky

Subject: Stream Classification

Rocky, I found this email on my stream classification question.

Stacey,

We should know the extent of the naturally reproducing, wild trout stream limits and biomass classification by the middle of July. The wild trout stream limits will allow the DEP to make the wetland classification determination and the biomass calculation will provide additional information and verification of the Chapter 93 Water Quality Standard Designation. Do you anticipate anyone from your team attending/participating in the stream survey? I have coordinated with DEP and Land Studies since the indicated they were interested in assisting. While anyone is welcome, we would still like to keep it manageable to maintain safe working conditions and accomplish the survey objectives.

Thanks,

Tom

Tom, Thank you for letting us know the stream survey dates. I'm going to pass that on to my team. Will the stream classification determination occur shortly after that, in the June or July timeframe?

I'll cross you off the site audit list for next week.

Stacey

Stacey, Amy,

At this point the PFBC is not planning to attend the 4/28-4/30 site audit meetings. I would like to have the stream survey /wetland determination data available and be able to provide our findings to the group. We have scheduled the Walker Run stream survey for June 16 and 17. The June survey dates will allow us to determine reproductive success, year class strength and calculate biomass for stream classification purposes. It is our intention to also view the wetlands then since the growing season will be under way.

If anyone has any questions, please do not hesitate to contact me.

Thanks,

Tom
