Not a problem - I'll be sure we have an extra line. Please let me know if there's anything else we'll need.

Best,
Drew

Hi Drew
Thanks.

After seeing this, it turns out that we need another person on the call, and I have confirmed that he is available at 11:30 on Tuesday, as well. So, we will need another bridge line. I hope that this is not a problem. If it is please let me know.

Subject: Conference Call Details

Dara -

The NRC staff biologists have two specific needs in this conference call. Both issues are closely related.

- 1.) NRC staff has been unable to generate the same impingement densities that Entergy produced in Table C-7 of Entergy's comments on the dSEIS using the data Entergy submitted in NL-07-156.
- 2.) NRC staff has also been unable to generate the same entrainment densities that Entergy produced in Table C-9 of Entergy's comments on the dSEIS using the data Entergy submitted in NL-07-156.

We're looking to determine whether we've missed something, whether there are differences between the data in NL-07-156 and the data used to produce the dSEIS comments, or whether Entergy has performed additional modifications, calculations, etc. to arrive at the numbers presented in the dSEIS comments. Dennis Logan, our senior biologist on the project, has also indicated that it may be worthwhile to have ASA's programmer for the data supplied in NL-07-156 available on the call, if possible. (If that's possible, and you require an extra line for that person, please let me know at your earliest convenience.)

Please let me know if you need any additional information, and please be in touch if there's anything you'd like to clarify in advance of call.

Best,
Drew
