Urgent **For Review** **Please Comment** **Please Reply** **Please Recycle**

● **Comments:**

Coleen,

Hopefully this clears things up regarding the possession limits.

Regards,

Greg

Re: Additional Information to Control No. 318362

Saint Luke's Hospital of Kansas City (SLH) is providing additional information to our letter dated July 22, 2009 that your office requested.

Please update possession limits as follows:

6.E. Not to exceed 5 Ci total.

6.H. 1 mCi. I-125 Iotrex was used in the Gliasite procedures originally developed by Proxima. This product is no longer available. The last Gliasite treatment was performed in May 2006. The I-125 has been decayed-in-storage and less than 1 mCi remains. We estimate that it will have decayed completely within another year.

If you have any questions regarding this application, please contact Greg Sackett at (816) 932-6296.

Thank you for your consideration.

A handwritten signature in black ink, appearing to read "Greg Sackett", written in a cursive style.
