

JAMES E. CARY
CANCER CENTER

Date: August 10, 2009

To: United States Nuclear Regulatory Commission, Region III
Chief, Materials Licensing Branch
2443 Warrenville Rd. Suite 210
Lisle, Illinois 60532-4352

Fr: Mr. Robert Hess
Interim Director, James E. Cary Cancer Center
5985 Hospital Dr.
Hannibal, Mo. 63401

Subject: License Amendment Requested as per 10CFR 35.14 for NRC License No. 24-32681-01

Please amend said license to include Stephen M. Rose, M.S. as an Authorized Medical Physicist. He joined our organization on April 27th 2009. He has previously been authorized on an Agreement State license for HDR and LDR. Please note highlighted areas on pgs 1, 3 & 9 of the enclosed license, Il-01361-01. Also please find copies of the training certificate for Oncentra Brachytherapy planning system, Nucletron training seminar for the microSelectron V3 and a statement from the Chief Medical Physicist from OSF St. Francis Medical Center attesting to Mr. Rose's participation in High Dose Rate Brachytherapy procedures.

This request was originally made via a letter dated May 14, 2009 as part of a larger amendment. That request was denied in a letter dated July 20, 2009. This request to add Mr. Rose as an Authorized Medical Physicist includes additional information and is seeking approval via a different pathway, as suggested in that letter.

Sincerely,

Robert Hess
Interim Director, James E. Cary Cancer Center

RECEIVED AUG 13 2009

A service of Hannibal Regional Hospital & Hannibal Clinic.

RADIOACTIVE MATERIAL LICENSE

Pursuant to the Illinois Radiation Protection Act and the rules and regulations in 32 Illinois Administrative Code promulgated thereunder, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, own, possess and transfer radioactive material(s) listed herein; and to use such radioactive material(s) for the purpose(s) and at the place(s) designated below. This license is subject to all applicable rules, regulations and orders of the Agency now or hereafter in effect and to any conditions specified in the license.

- K. One source train for use in the Novoste Beta-Cath 5F System, Model A1732 (30 mm) for the intravascular treatment of in-stent restenosis in one device, with one device containing a source train for exchange.
- L. One source train for use in the Novoste Beta-Cath 3.5F System, Model A1767 (30 mm) for the intravascular treatment of in-stent restenosis in one device, with one device containing a source train for exchange.
- M. One source train for use in the Novoste Beta-Cath 5F System, Model A1733 (40 mm) for the intravascular treatment of in-stent restenosis in one device, with one device containing a source train for exchange.
- N. One source train for use in the Novoste Beta-Cath 3.5F System, Model A1767 (40 mm) for the intravascular treatment of in-stent restenosis in one device, with one device containing a source train for exchange.
- O. One source train for use in the Novoste Beta-Cath 5F System, Model A1730 (60 mm) for the intravascular treatment of in-stent restenosis in one device, with one device containing a source train for exchange. This device may also be used for clinical research in accordance with investigational protocols approved by the FDA in the treatment of stenosis in hemodialysis grafts.
- P. For use in a three ribbon set containing 6, 10 or 14 sources per ribbon. One ribbon set to be used for the intravascular treatment of in-stent restenosis in a Cordis Chockmate Catheter System and one ribbon set in a shipping container for exchange.
- Q. For use in Proxima Therapeutics Model Gliasite low dose rate brachytherapy system.
- R. One source train for use in the Novoste Beta-Cath 3.5F System, Model A1767 (60 mm) for the intravascular treatment of in-stent restenosis in one device, with one device containing a source train for exchange.

CONDITIONS

1. A. Radioactive material shall be used only at the licensee's facilities located at 530 N.E. Glen Oak Avenue, Peoria, Illinois, including the Isotope Storage Room G738A of the Radiation Oncology Service located in the Forest Park Building, in accordance with statements, representations and procedures listed in other conditions of this license.
- B. License Schedule Items D. and F., excluding aerosols and gases, shall be used only at the licensee's facilities located at 5405 North Knoxville Avenue, Peoria, Illinois and at 610 Park Avenue, Pekin, Illinois in accordance with statements, representations and procedures listed in other conditions of this license.
2. A. Radioactive material is authorized for use by, or under the supervision of, the following individual(s) for the materials and uses indicated:

Raymond E. Bertino, M.D.	E., F., G. and H.
Anthony D. Brody, Ph.D., M.D.	F., excluding aerosols and gases
Eric M. Bugaieski, M.D.	E. and F.
Gordon T. Campbell, M.D.	E., F., G. and I.
Charles Chen, M.D.	E., F., G. and H.
Paul W. Cheng, M.D.	F., excluding aerosols and gases, limited to cardiovascular studies
Gerald N. Dixon, M.D.	E. and F.
Kevin M. Fahey, M.D.	F.
Craig A. Fenton, M.D.	F.
George A. Gentry, M.D.	F.
Joseph K. Gerwin, M.D.	E. and F.

4. Radioactive material listed in License Schedule Item A. shall be used for performing calibration and quality assurance checks of radiation therapy unit in accordance with manufacturer's procedures. These procedures shall be performed by, or under the supervision and in the physical presence of W. Gregg Devanna, M.S., Mohamed Ali, M.S., or by persons specifically authorized by the Agency, an Agreement State, a Licensing State or the U.S. Nuclear Regulatory Commission to perform such services.
5.
 - A. Each sealed source possessed under this license shall be tested for leakage and/or contamination as specified in 32 Ill. Adm. Code 340.410. Tests for leakage and/or contamination shall be performed by persons specifically licensed to provide such services.
 - B. This license does not authorize analysis of leak test samples. However, the licensee is authorized to collect leak test samples for analysis by persons specifically authorized by the Agency, an Agreement State, a Licensing State, or the U.S. Nuclear Regulatory Commission to perform such services.
6. The licensee shall decontaminate or restrict access to each area described in 32 Ill. Adm. Code 335.2080(d) for which removable radioactive contamination is found to exceed 2000 dpm/100 cm². This monitoring must be performed to ensure that decontamination was effective or decay reduced the levels adequately. Records of monitoring must contain the information specified in 32 Ill. Adm. Code 335.2080(f).
7. The licensee is authorized to receive, possess and transfer depleted uranium in amounts not greater than 999 kg for use as shielding material.
8. Sealed sources containing radioactive material shall not be opened.
9. Servicing and maintenance of bone densitometer(s) involving the source holder and/or shutter mechanism(s) shall be performed by the manufacturer or by other persons specifically authorized by the Agency, an Agreement State, or the U.S Nuclear Regulatory Commission to perform such services.
10. The licensee shall cease treatment of patients with any low dose rate or high dose rate afterloader if a safety related system of the unit is found inoperative. The licensee shall report to the Agency within 24 hours any malfunction which requires the termination of patient treatments for more than 24 hours and shall submit a written report of the incident and corrective actions within 30 days.

11. Calibration and quality assurance checks of low dose rate or high dose rate afterloaders shall be performed in accordance with the manufacturer's instruction manual. These procedures shall be performed by, or under the supervision and in the physical presence of W. Gregg Devanna, James J. Duce, Stephen M. Rose, Mohamed Ali, M.S., Hemant Shukla, M.S., or by persons specifically authorized by the Agency, an Agreement State, a Licensing State or the U.S. Nuclear Regulatory Commission to perform such services.
12. Radioactive material listed in License Schedule Items K. through P. and R. shall be used for performing calibration and quality assurance checks of IVB devices in accordance with letters with attachments dated September 24, 2001, October 22, 2001, November 5, 2001 and January 28, 2004. These procedures shall be performed by or under the supervision and in the physical presence of W. Gregg Devanna, M.S., James D. Duce, Stephen Rose, or by persons specifically authorized by the Agency, Agreement State, Licensing State or the U.S. NRC to perform such services.
13. In accordance with 32 Ill. Adm. Code 326 and Reclamation Plan and Cost Estimate submitted on April 9, 2007, the licensee shall maintain a financial assurance arrangement as determined necessary by the Agency to provide for the protection of the public health and safety. The term of the financial assurance arrangement shall be for the period from issuance of the license until termination of the license by the Agency in accordance with 32 Ill. Adm. Code 330.320. The Reclamation Plan and Cost Estimate is to be evaluated periodically by the licensee to reflect current costs and changes to operations. If warranted, the financial assurance arrangement shall be updated and submitted to the Agency for review and approval.
14. In addition to the possession limits referenced in the license schedule, the licensee shall further restrict possession of radionuclides, excluding License Schedule Item A., listed in the table below to the quantities noted within the table. Sum of fractions for the radionuclides listed below shall not exceed unity:

<u>Radionuclide</u>	<u>Quantity (curies)</u>	<u>Radionuclide</u>	<u>Quantity (curies)</u>

 Instructor Title: Field Service Engineer

**OSF**SAINT FRANCIS MEDICAL CENTER
A commitment to life.

May 1, 2009

To Whom It May Concern:

I am writing this letter to affirm that Mr. Stephen Rose, MS, DABR, a Medical Physicist certified in Therapeutic Radiation Oncology Physics by the American Board of Radiology, was a substantial participant in the brachytherapy program at OSF Saint Francis Medical Center in Peoria, Illinois from 2003 to 2009.

During this time Mr. Rose operated in the capacity of an Authorized Medical Physicist for the Gamma Med 12i High Dose Rate Remote Afterloader (Illinois Radioactive Materials License IL-1361-01). He was the primary Physicist for the treatment planning and administration of over five hundred (500) patient treatments. Modalities included multi-channel prostate brachytherapy, gyn cylinders and tandem & ovoid, mammosite, lung, esophagus, and multi-planar breast implants.

Mr. Rose also participated in approximately twenty source exchanges during his time at OSF Saint Francis Medical Center. Associated with the source exchanges, he performed daily, monthly, quarterly, semi-annual, and annual quality assurance procedures as required by state and federal regulations.

Sincerely,

W. Gregg Devanna, MS, DABR
Chief Medical Physicist / RSO
OSF Saint Francis Medical Center
