Michelle Simmons
Health Physicist
U.S. Nuclear Regulatory Commission
Division of Nuclear Materials Safety
475 Allendale Road
King of Prussia, PA 19406

Dear Ms. Simmons:

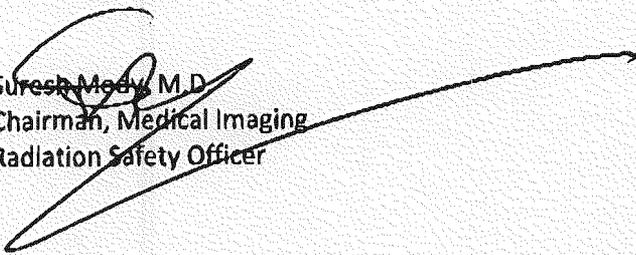

RE: Docket No: 03002490
License No: 29-06759-01
Mali Control No: 143249

In response to your email dated 8/13/2009, we confirm the following:

1. Phosphorus 32 and Strontium 90 sealed sources have never been possessed at our facility.
2. As for Isotopes under 10CFR 31.11(a), we were using I-125, I-131 and Co-57 for in vitro studies. We have since discontinued doing those studies. These materials are no longer possessed at our facility. The prep lab that was used for the in vitro studies is still a restricted area. Hence a close-out survey is not warranted at this time.
3. Please remove Drs. Carnes and Modi from our license and add Dr. Suresh Mody, M.D. as an authorized user for Americium 241.

We thank you for your inputs regarding these amendments.

Sincerely yours,

Suresh Mody, M.D.
Chairman, Medical Imaging
Radiation Safety Officer
