Subject: Proposed GE-Hitachi Uranium Enrichment Facility, Wilmington, N C

I would like for the NRC to consider these items in the environmental review:

1. Effect of the Proposed Facility on groundwater supply and quantity
2. Effect on Surface water quantity
3. The conclusion of small negative effect stated in the Environmental Justice Section

I think the report is well done, however wonder about the methods of communicating it to the public. Very few people I talk with that live in my neighborhood, immediately south of the G E facility don't know anything about it. I think you should always hold some type of forum in a facility closer to the areas affected.
