SUBJECT

Control No. 318172- Re - Amendment request for License No. 21-21068-01, by application and letter, both dated May 12, 2009, regarding request to add a new location of use (Ft Lewis, Washington) for the GID-3 chemical agent detectors having Ni-63 electroplated sources of up to 15 millicuries each. Also requested was the deletion from the license of two locations of use as well as the apparent change in the name of two other locations of use.

SUMMARY

In a telephone conversation with Mr. Rose on this date, the following items were discussed:

1. Regarding request to delete from the license, as an authorized area of use, Building 105 at the Anniston, Alabama facility, Mr. Rose stated that the subject licensee has never possessed or used any licensed material at this facility nor has any plans to do so.
2. Regarding request to delete from the license, as an authorized area of use, General Motors Proving Grounds, General Motors Road, Military Building 12, Milford, Michigan, Mr. Rose stated the licensee's only use of the licensed material at this facility was terminated in about 15 years ago. Further, he stated that the only use under this license involved military tanks being operated on the testing track which had as a component of the complete tank, a sighting device containing a non-leaking sealed source of Hydrogen-3, not subject to leak testing.
3. Regarding the requested change in the names of the two locations of use at Sterling Heights, Michigan, namely "Central Office" vs. former " Sterling Heights Complex" (at 38500 Mound Road) and "Logistics & Engineering Facility" vs. "Sterling Plant" (at 6000 E. 17 Mile Road), Mr. Rose confirmed that these represented name changes only and do not involve any change in locations of use or release for unrestricted use of any former locations of use.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this conversation record will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS).
