Benbrook, Texas 76126

SUBJECT: LICENSE AMENDMENT

Please find enclosed Amendment Number 22 to NRC License Number 42-26891-01, **which incorporates your new mailing address.**

NRC licensees are required to update their decommissioning cost estimate at intervals not to exceed 3 years as required by 10 CFR 30.35(e). Please submit the following items to meet this regulatory requirement and to ensure the instrument reflects the license name, mailing address and contact information.

1. Updated Decommissioning Funding Plan (DFP)
2. Updated Decommissioning Cost Estimate (DCE)
3. Updated Financial Assurance Instrument, which includes your Surety Bond (SB)
4. Updated Standby Trust Agreement (STB)

The model templates for these documents are available in Appendix A of NUREG 1757, Volume 3, "Consolidated Guidance about Materials Licenses." The NUREG document is available at: <http://www.nrc.gov/reading-rm/doc-collections/nureqs/staff/srl757/>. If you have any questions regarding financial assurance or this request, please contact Mr. Roberto Torres at (817) 860-8189.

NRC's Regulatory Issue Summary (RIS) 2005-31, provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/>. Additionally, the link for frequently asked questions may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/materials.html>. Pursuant to NRC's RIS 2005-31, the enclosed materials license will not be made publicly available.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14)(xi). You should review the enclosed document carefully and be sure that you understand all conditions. If there are any questions, please contact me at 817-276-6552.

NRC expects licensees to conduct their programs with meticulous attention to detail and a high standard of compliance. Because of the serious consequences to employees and the public that can result from failure to comply with NRC requirements, you must conduct your radiation safety program according to the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate by NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers: Inspection and Investigations," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Notify NRC in writing of any change in mailing address.
3. Request and obtain a license amendment before you:
 - a. Change Radiation Safety Officers;
 - b. Order byproduct material in excess of the amount, radionuclide or form authorized on the license;
 - c. Add or change the areas or address(es) of use identified in the license application or on the license; or
 - d. Change the name or ownership of your organization.

NRC will periodically inspect your radiation safety program. Failure to conduct your program according to NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available on the following internet address: <http://www.nrc.gov/reading-rm/doc-collections/enforcement/>.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

Rachel S. Browder, Health Physicist
Nuclear Materials Safety Branch B
