Name of Participant(s):

Subject: Further  
Clarifications

(NOTE: This will be used as the  
Documents Title in ADAMS)

Mr Giardina specified that the brachytherapy sources to remain in the license are the I-125 seeds (North American Scientific Inc. Model MED 3631) the Cs-137 sources need to be deleted as they were properly disposed of, as verified by Tara Weidner during a recent inspection. The correct spelling of the last name of the proposed AMP is Ndlovu. I stressed that Dr. Ndlovu is qualified for Hackensack's Nucletron's unit but not for the GammaMed unit possessed by the licensee. I stressed the urgency of getting evidence of Dr. Ndlovu's qualification for the GammaMed because NJ is about to become an Agreement State. Mr. Giardina stated that he will follow up immediately.

### Action Required:

Wait for the licensee's response or void the action and let the licensee deal directly with NJ.
