NUCLEAR REGULATORY COMMISSION  
REGION III  
2443 WARRENVILLE ROAD, SUITE 210  
LISLE, ILLINOIS 60532-4352

AUG 21 2009

Kathleen A. Johnson  
Radiation Safety Officer  
Owens Corning World Headquarters  
One Owen Corning Parkway  
Toledo, OH 43659

Dear Ms. Johnson:

Enclosed is Amendment No. 2 to your NRC Material License No. 34-18712-02 in accordance with your request. Please note that the major changes made to your license are printed in bold font.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission (USNRC), Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please note, we have extended the expiration date of your license to January 31, 2010. The USNRC issued Consolidated Guidance about Materials Licenses: Program-Specific Guidance about Fixed Gauge Licenses in NUREG-1556, Volume 4, in October 1998, to provide guidance for completing an application for the use of sealed sources in fixed gauging devices. NUREG-1556, Volume 4 outlines the necessary information needed to complete a renewal application. Please see the enclosed copy of NUREG- 1556, Volume 4, dated October 1998.

Also, as we discussed by telephone on August 20, 2009, since you have locations of use in Indiana and New Jersey (which is to become an Agreement State) the license will be "split" by another amendment at a later date.

Please be advised that your license expires at the end of the day, in the month, and year stated in the license. Unless your license has been terminated, you must conduct your program involving byproduct materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Notify NRC, in writing, within 30 days:
  - a. When the Radiation Safety Officer permanently discontinues performance of duties under the license or has a name change; or
  - b. When the mailing address listed on the license changes.

3. In accordance with 10 CFR 30.36(d) and/or license condition, notify NRC, promptly, in writing, and request termination of the license:
  - a. When you decide to terminate all activities involving materials authorized under the license; or
  - b. If you decide not to complete the facility, acquire equipment, or possess and use authorized material.
4. Request and obtain a license amendment before you:
  - a. Order byproduct material in excess of the amount, or radionuclide, or form different than authorized on the license;
  - b. Add or change the areas of use or address or addresses of use identified in the license application or on the license; or
  - c. Change ownership of your organization.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

William P. Reichhold  
Materials Licensing Branch
