Withdrawal of Request For Approval To Use A Subsequent ASME Code Edition And
Addenda For The Second IWE Interval

Reference: Letter from NSPM to NRC, "Request For Approval To Use A Subsequent ASME
Code Edition And Addenda For The Second IWE Interval", dated July 29, 2009

Federal Register Notice, 73FR52730, "Industry Codes and Standards; Amended
Requirements; Final Rule", dated September 10, 2008

Based on discussions with the NRC staff on August 4, 2009, Northern States Power Company, a
Minnesota corporation (NSPM) is withdrawing its request, dated July 29, 2009, to use a
subsequent ASME Code Edition and Addenda for the second IWE interval for the Prairie Island
and Monticello Nuclear Generating Plants.

NSPM initially interpreted language in the September 10, 2008 Federal Register referring to the
"code of record for the ISI interval in question" to be referring to the code of record for the overall
ISI program. The staff indicated in an August 4, 2009 teleconference that in the case where the
class MC interval is different than the remainder of the ISI program, the phrase refers to the class
MC interval. The intervals for class MC components and the remainder of the ISI program are
treated separately. As such, in accordance with 10 CFR 50.55a(g)(4)(ii) and 10 CFR
50.55a(g)(6)(ii)(B), the 2003 Addenda is the appropriate addenda for the second interval of the
CISI program at each site and adopting the 2003 Addenda for the second interval of the CISI
program at each site does not require NRC approval.

Summary of Commitments

This letter makes no new commitments and no revisions to existing commitments.

A handwritten signature in cursive script, appearing to read "Gabor Salamon", is written over a horizontal line.
