PUBLIC DISCLOSURE PURSUANT TO 10 CFR 2.390**

Performance Contracting, Inc.
Suction Flow Control Device (SFCD) Technology Document

Debris Preparation SSFS-TD-2007-004 Supplement 1 Rev 1;

Reference: *Sure-Flow[®] Suction Strainer – Testing Debris Preparation & Surrogates* (PCI Document No. SSFS-TD-2007-004, Revision 4; PCI Document ID: PCI-6016-02.01)

Dear Sir:

Performance Contracting Inc. (PCI) is submitting the attached document for the US Nuclear Regulatory Commission's (USNRC) use when referenced by U.S. Licensees as part of their preparation of and responses to the Generic Letter 2004-02.

It should be noted that PCI previously submitted the referenced document; *Sure-Flow[®] Suction Strainer – Testing Debris Preparation & Surrogates* (PCI Document No. SSFS-TD-2007-004, Revision 4 to the USNRC March 25, 2009 by PCI Document ID: PCI-6016-02.01. PCI's previous submittal as well as this submittal is submitted pursuant to 10 CFR 2.390.

The purpose of submitting the subject document is to generically address USNRC issues (if any) regarding various aspects of the SFS Testing Protocol. It should be noted that PCI provides this submittal to the USNRC for the specific purpose of assisting our clients in the resolution of Generic Letter 2004-02 and RAIs applicable to those clients.

All of our clients will be notified of this distribution to the USNRC so that each PCI Sure-Flow[®] Strainer client may utilize and/or reference the subject attached document as appropriate.

A116
NRR

PCI requests this document be withheld from public disclosure, because it contains intellectual property of Performance Contracting, Inc. developed at considerable expense by the company. Public release of this material would allow this material to be used by others, resulting in commercial detriment to Performance Contracting, Inc. Accordingly, we have attached an affidavit pursuant to 10 CFR 2.390 to this letter. We note that this document has never been disclosed to the public. The following attachment is provided:

Attachment 1: Debris Preparation SSFS-TD-2007-004, **Supplement 1 Rev 1;** a supplement to the reference document below that describes in more detail how fibrous debris was prepared for large flume testing and a quantitative calculation to define a bounding quantity of fines reasonably expected in a post-LOCA event based on applicable industry data.

Reference *Sure-Flow[®] Suction Strainer – Testing Debris Preparation & Surrogates* (PCI Document No. SSFS-TD-2007-004, Revision 4)

Principal Change from Supplement 1 Rev 0: Added a Proprietary Statement to Supplement 1's footer.

Note: Principal change to PCI Document No. SSFS-TD-2007-004, Revision 4 is this provides more information about fiber preparation and size distribution.

Attachment 2: Affidavit Pursuant to 10 CFR 2.390 - Affidavit requesting that **Attachment 1** be withheld from public disclosure.

I am the PCI authorized officer responsible for executing the **Attachment 2** Affidavit and I am located at:

Performance Contracting, Inc.
Engineered Systems Group
16047 West 110th Street
Lenexa, KS 66219

We greatly appreciate the USNRC's effort, specifically as it relates to the Safety Issues Resolution Branch's attention to the review of PCI's documents and reports.

Sincerely,

A handwritten signature in black ink, appearing to read "James M. Bleigh". The signature is fluid and cursive, with a large initial "J" and "M".

James M. Bleigh
PCI / Engineered Systems Group Manager

cc: Joe Golla; Project Manager, DPR/PGCB, or

Mr. Michael L. Scott, Branch Chief
Safety Issues Resolution Branch
Division of Safety Systems
Office of Nuclear Reactor Regulation

AFFIDAVIT PURSUANT TO 10 CFR 2.390

I, James M. Bleigh, being duly sworn, depose and state as follows:

- (1) I am the Performance Contracting, Inc. (PCI), Manager PCI Engineered Systems Division (ESD) and have reviewed the information described in paragraph (2) which is sought to be withheld, and am authorized to apply for its withholding.
- (2) The information sought to be withheld is Attachment 1 to this PCI letter; Document ID: PCI-6016-03.00 containing design and operational performance documents and attachments developed by Performance Contracting, Inc. in support of PCI's patented Sure-Flow[®] Strainer (SFS) that integrates suction flow control device (SFCD) technology. This information is considered proprietary to Performance Contracting, Inc. as is appropriately annotated as such.
- (3) In making this application for withholding of proprietary information of which it is the owner, Performance Contracting, Inc. relies upon the exemption from disclosure set forth in the Freedom of Information Act ("FOIA"), 5 USC Sec. 552(b)(4) and the Trade Secrets Act, 18 USC Sec. 1905, and NRC regulations 10CFR Part 9.17(a)(4), 2.390(a)(4), and 2.390(b)(1) for "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (Exemption 4). The material for which exemption from disclosure is here sought is all "confidential commercial information", and some portions also qualify under the narrower definition of "trade secret", within the meanings assigned to those terms for purposes of FOIA Exemption 4 in, respectively, *Critical Mass Energy Project v. Nuclear Regulatory Commission*, 975F2d871 (DC Cir. 1992), and *Public Citizen Health Research Group v. FDA*, 704F2d1280 (DC Cir. 1983).
- (4) Some examples of categories of information which fit into the definition of proprietary information are:
 - a. Information that discloses a process, method, or apparatus, including supporting data and analyses, where prevention of its use by Performance Contracting, Inc.'s competitors without license from Performance Contracting, Inc. constitutes a competitive economic advantage over other companies;
 - b. Information which, if used by a competitor, would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing of a similar product.

AFFIDAVIT PURSUANT TO 10 CFR 2.390

- c. Information which reveals cost or price information, production, capacities, budget levels, or commercial strategies of Performance Contracting, Inc., its customers, or its suppliers;
- d. Information which reveals aspects of past, present, or future Performance Contracting customer-funded development plans and programs of potential commercial value to Performance Contracting, Inc.;
- e. Information which discloses patentable subject matter for which it may be desirable to obtain patent protection.

The information sought to be withheld is considered to be proprietary for the reasons set forth in paragraphs 4.a above.

- (5) The information sought to be withheld is being submitted to the NRC in confidence. The information (including that compiled from many sources) is of a sort customarily held in confidence by Performance Contracting, Inc., and is in fact so held. The information sought to be withheld has, to the best of my knowledge and belief, consistently been held in confidence by Performance Contracting, Inc. No public disclosure has been made, and it is not available in public sources. All disclosures to third parties, including any required transmittals to the NRC, have been made, or must be made, pursuant to regulatory provisions or proprietary agreements which provide for maintenance of the information in confidence. Its initial designation as proprietary information, and the subsequent steps taken to prevent its unauthorized disclosure, are as set forth in paragraphs (6) and (7) following.
- (6) Initial approval of proprietary treatment of a document is made by the manager of the originating component, the person most likely to be acquainted with the value and sensitivity of the information in relation to industry knowledge. Access to such documents within Performance Contracting, Inc. is limited on a "need to know" basis.

AFFIDAVIT PURSUANT TO 10 CFR 2.390

- (7) The procedure for approval of external release of such a document typically requires review by the staff manager, project manager, principal scientist or other equivalent authority, by the manager of the cognizant marketing function (or his designee), and by the Legal Operation, for technical content, competitive effect, and determination of the accuracy of the proprietary designation. Disclosures outside Performance Contracting, Inc. are limited to regulatory bodies, customers, and potential customers, and their agents, suppliers, and licensees, and others with a legitimate need for the information, and then only in accordance with appropriate regulatory provisions or proprietary agreements.
- (8) The information classified as proprietary was developed and compiled by Performance Contracting, Inc. at a significant cost to Performance Contracting, Inc. This information is classified as proprietary because it contains detailed descriptions of analytical approaches and methodologies not available elsewhere. This information would provide other parties, including competitors, with information from Performance Contracting, Inc.'s technical database and the results of evaluations performed by Performance Contracting, Inc. A substantial effort has been expended by Performance Contracting, Inc. to develop this information. Release of this information would improve a competitor's position because it would enable Performance Contracting, Inc.'s competitor to copy our technology and offer it for sale in competition with our company, causing us financial injury.
- (9) Public disclosure of the information sought to be withheld is likely to cause substantial harm to Performance Contracting, Inc.'s competitive position and foreclose or reduce the availability of profit-making opportunities. The information is part of Performance Contracting, Inc.'s comprehensive Sure-Flow[®] Strainer technology base, and its commercial value extends beyond the original development cost. The value of the technology base goes beyond the extensive physical database and analytical methodology, and includes development of the expertise to determine and apply the appropriate evaluation process. The research, development, engineering, and analytical costs comprise a substantial investment of time and money by Performance Contracting, Inc.

The precise value of the expertise to devise an evaluation process and apply the correct analytical methodology is difficult to quantify, but it clearly is substantial.

AFFIDAVIT PURSUANT TO 10 CFR 2.390

Performance Contracting, Inc.'s competitive advantage will be lost if its competitors are able to use the results of the Performance Contracting, Inc. experience to normalize or verify their own process or if they are able to claim an equivalent understanding by demonstrating that they can arrive at the same or similar conclusions.

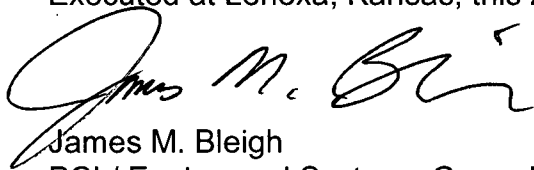

The value of this information to Performance Contracting, Inc. would be lost if the information were disclosed to the public. Making such information available to competitors without their having been required to undertake a similar expenditure of resources would unfairly provide competitors with a windfall, and deprive Performance Contracting, Inc. of the opportunity to exercise its competitive advantage to seek an adequate return on its large investment in developing these very valuable analytical tools.
