

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

September 28, 2009

Mr. David J. Bannister  
Vice President and CNO  
Omaha Public Power District  
Fort Calhoun Station FC-2-4  
Post Office Box 550  
Fort Calhoun, NE 68023-0550

SUBJECT: FORT CALHOUN STATION, UNIT NO. 1 – CORRECTION TO AMENDMENT NO. 260 RE: MODIFICATION OF SURVEILLANCE REQUIREMENTS FOR CONTAINMENT AIR COOLING AND FILTERING SYSTEM AND REMOVAL OF LICENSE CONDITIONS (TAC NO. ME0051)

Dear Mr. Bannister:

On July 22, 2009, the U.S. Nuclear Regulatory Commission (NRC) issued Amendment No. 260, to Facility Operating License No. DPR-40 for the Fort Calhoun (FCS), Unit 1. The amendment consisted of changes to the facility operating licenses and the Technical Specifications (TSs) in response to your application dated October 31, 2008.

Amendment No. 260 modified TS 3.6(3), "Containment Recirculating Air Cooling and Filtering System," by adding two new Surveillance Requirements (SRs) and modifying SRs 3.6(3)b, e and f. In addition, the amendment removed the license conditions related to the replacement and testing of containment air cooling and filtering (CACF) unit high-efficiency particulate air filters and surveillance testing of the CACF unit relief ports. Omaha Public Power District had committed to these license conditions by letter dated April 10, 2008, and were implemented via TS Amendment No. 255 dated May 2, 2008.

Amendment No. 260 deleted Additional Conditions (2) and (3) in Appendix B associated with Amendment 255. In addition, Amendment No. 260 renumbered Additional Condition (4) for Amendment No. 257 to Additional Condition (2). Due to an administrative error, the issued revised page Appendix B – Page 1 of the TSs inadvertently revised the implementation date for Additional Condition (2). Our approval of Amendment No. 257 stated that the amendment shall be effective as of the date of its issuance and shall be implemented within 270 days of the date of issuance. However, our approval Amendment No. 260 revised Appendix B – Page 1 to state that Amendment No. 257 is effective as of its date of issuance and shall be implemented prior to startup from the 2008 refueling outage. Therefore, the effective date stated for Amendment No. 257 was inadvertently changed as result of our approval of Amendment No. 260.

This error did not impact Amendment No. 260 for FCS. The error does not change the NRC staff conclusions regarding Amendment No. 260 for FCS. Enclosed is a corrected version of page Appendix B – Page 1. Please discard the associated page from the previous amendment and replace it with the enclosed page.

D. Bannister

# TECHNICAL SPECIFICATIONS

## Appendix B

### Additional Conditions

#### Renewed Facility Operating License No. DPR-40

Omaha Public Power District shall comply with the following conditions on the schedules noted below:

<u>Amendment Number</u>	<u>Additional Conditions</u>	<u>Implementation Date</u>
181	(1) The licensee is authorized to relocate certain technical specification requirements to licensee-controlled documents. Implementation of this amendment shall include the relocation of these technical specification requirements to the appropriate documents, as described in the licensee's application dated November 20, 1996, as supplemented by letters dated February 20, 1997, and March 25, 1997, and evaluated in the staff's safety evaluation dated March 27, 1997.	The amendment shall be implemented as of its date of issuance.
257	(2) Upon implementation of Amendment No. 257 adopting TSTF-448, Revision 3, the determination of control room envelope (CRE) unfiltered air inleakage as required by TS 3.1, Table 3-3, Item 10.b. in accordance with TS 5.24c.(i), the assessment of CRE habitability as required by Specification 5.24c.(ii), and the measurement of CRE pressure as required by Specification 5.24d, shall be considered met. Following implementation:  (a) The first performance of TS 3.1, Table 3-3, Item 10.b., in accordance with Specification 5.24c.(i), shall be within the next 18 months as the time period since the most recent successful tracer gas test is greater than 6 years.  (b) The first performance of the periodic assessment of CRE habitability, Specification 5.24c(ii), shall be within the next 9 months as the time period since the most recent successful tracer gas test is greater than 3 years.  (c) The first performance of the periodic measurement of CRE pressure, Specification 5.24d., shall be within the next 138 days.	The amendment is effective as of the date of its issuance and shall be implemented within 270 days of the date of issuance.
