

September 4, 2009

Mr. Joseph DiCamillo
General Counsel
Studsvik, Inc.
5605 Glenridge Dr., Suite 705
Atlanta, GA 30342

Dear Mr. DeCamillo:

I am writing in response to your letter of August 7, 2009, to U.S. Nuclear Regulatory Commission (NRC) Chairman Gregory Jaczko in which you provided Studsvik's comments on blending of low-level radioactive waste (LLW). This issue was raised in the April 17, 2009, Commission meeting relating to the management and disposal of LLW. We appreciate your comments and we will respond in more detail in the near future. In the meantime, I am attaching a letter I recently signed that describes the NRC's current position on blending of LLW in response to certain specific questions posed by Energy Solutions. Note that we intend to revise our Branch Technical Position on concentration averaging. Thus, while the positions described in this letter are applicable now, the staff anticipates revisions in the future and we will consider your views at that time as well.

If you have any questions, please call me at (301) 415-7437.

Sincerely,

/RA/

Larry W. Camper, Director
Division of Waste Management
and Environmental Protection
Office of Federal and State Materials
and Environmental Management Programs

Enclosure:
Letter to T. Magatte
