Subject: Protected Area and RCA access information requirements
Attachments: PA Access Info Requirements.xls

Michael and Joe,

The attached spreadsheet columns A-F detail the information that will be required for anyone to enter the protected area (PA). Column G will be helpful for us to associate which person will be on which PA tour. Please add this information for each individual from your respective groups, including sub-contractors, which will require access to the protected area of the plant and return the file to me. I offer the following input for groups that will require PA access.

- 1) The MET System Group tour will require entry into the PA.
- 2) Regarding the radwaste specialized tour, the 1&2 installed system is not similar to the proposed 3&4 system. The only similarities between 1&2 and 3&4 is the fact that both utilize a leased mobile skid system to ensure effluent levels from normal operations are well below regulatory requirements. The installed permanent systems are relied upon meet the design basis regulatory requirements. Terry Edwards, CPNPP Radwaste Supervisor will address the 2/24 1:00 - 3:00 Fuel Cycle and Waste Systems breakout group to tell them about the U 1&2 and U 3&4 RW systems. Depending on the results of this discussion, the HP and Radwaste group may require entry into the RCA to tour the 1&2 RW system. If it is deemed necessary to tour the RW systems inside the RCA from 3-5 , the HP/Public Health and FC/WS will not be able to accomplish the objective of touring the REMP monitoring locations within this timeframe.

With all that being said, there is a chance that the HP/Public Health and FC/WS group will require access to the protected area, so please gather the required information as noted on the attached spreadsheet for this group as well.

The attached file may also be found in the following link on the Luminant server.
