ADAMSAccessionNumber: ML092430287

Hi Jennifer,

The path forward looks great to me. My availability is not good for Thursday August 6, 2009. However, please don't delay the planned phone conference with the utilities on my account; I will be happy to hear that it went well and the path forward is agreeable to them as well.

Thanks,  
Richard

Subject: Path Forward: Process for Completing Section 106 Consultation

Afternoon Everyone,

Per our teleconference today with representatives of SC SHPO and the U.S. Army Corps on Engineers, we have identified a path forward for completing Section 106 consultation for V.C. Summer Unit 3.

We would like to conduct a teleconference with all parties tomorrow, Thursday, August 6th. Please let me or Jack Cushing know your availability.

Once a time is settled upon, I will forward the telephone bridge line information. April, if you don't mind, please forward this email to Santee Cooper.

#### Process for Completing Section 106 Consultation for VC Summer Unit 3

1. SCE&G, Santee Cooper and the South Carolina State Historic Preservation Officer (SHPO) will develop a management agreement.
2. SCE&G and Santee Cooper will submit the management agreement signed by SCE&G, Santee Cooper and the South Carolina SHPO to the Nuclear Regulatory Commission (NRC) under oath or affirmation.
3. The NRC will cite the management agreement in the draft environmental impact statement that it is developing in cooperation with the Army Corps of Engineers. The management agreement will be part of the basis for determining impact levels to cultural and historic resources in the EIS.
4. Section 106 Consultation will be completed for both the NRC and the Army Corps of Engineers in accordance with 36 CFR 800.8 (c) "Coordination with the National Environmental Policy Act," by the South Carolina SHPO providing a letter, in response to a request for comments on the draft EIS, to the NRC and the Army Corp of Engineers documenting that consultation is completed.

#### Schedule

The management agreement will be submitted to the NRC by January 15, 2010 (tentative date).

Thank you,

Jennifer
