**PRECISION  
SPECIALTY METALS**  
A Worthington Industries Company

August 27, 2009

Secretary, United States Nuclear Regulatory Commission  
Washington, DC 20555-0001

ATTN: Rulemakings and Adjudications Staff

Precision Specialty Metals is extremely concerned about the proposed rule changes the Regulatory Commission sent out on August 5, 2009 (Docket ID NCR-2008-0272). Focusing us to switch from a General License to a Specific License would cause dramatic increases to our company's operational cost due to the additional training, administration cost and annual fees. In today's business climate, we simply cannot afford to take on increased costs in either of these areas.

Precision Specialty Metals ask that the U.S. Nuclear Regulatory Commission reconsider these proposed changes and allow us to remain Generally Licensed.

Sincerely,

Patrick Clark

General Manager
