

LWA Applications and As-built Definition

Jerry Wilson

Office of New Reactors

September 2, 2009

- Final LWA rule issued October 9, 2007 (72 FR 57415)
- Amended rule became effective November 8, 2007
- LWA process allows applicants to perform limited construction activities before combined license issuance

- Description of requested activities – 50.10(d)(3)(i)
- Safety analysis of requested activities – 50.10(d)(3)(i)
- Proposed ITAAC for requested activities – 52.80(a)
- Description of technical qualifications – 50.10(e)(1)(iii)
- Environmental report – 51.49
- Plan for redress of activities performed – 50.10(d)(3)(iii)

- As-built means the physical properties of a structure, system, or component following the completion of its installation or construction activities at its final location at the plant site. In cases where access to the component for inspection or test is impractical after installation in the plant, determination of physical properties of the as-built structure, system, or component may be based on measurements, inspections, or tests that occur prior to installation, provided that subsequent fabrication, handling, installation, and testing do not alter the properties.
