Re: Byproduct Materials License NP
Nº 52-30841-01

Dear Miss Roldan:

03036419

I am submitting the following additional information to supplement my original amendment request:

1. Copy of the letter of Agreement between Ms. Palacios and my self which covers some of the requested information.
2. Ms. Maria Margarita Palacios has been involved as Radiation Safety Officer in numerous NRC licenses since 1962. She makes weekly visits at each site which lasts between one to one and a half hour, depending on need. You can verify her efficiency, as well as the quality of the radiation programs she has established and oversees by asking any of the inspectors assigned to Puerto Rico...past and present. Some of the NRC licenses where Ms. Palacios is the RSO are the following:
 - CT Radiology Complex 52-14931-01 since February 1971.
 - Pavia Hospital-Santurce 52-15139-01 since July 1970.
 - Cardiovascular Radiology Institute 52-25016-01
 - Cardiovascular Associates of P.R. 52-25033-01
 - PET Imaging Corp. 52-31094-01, etc
3. Ms. Palacios is readily available on her cell phone. Puerto Rico is a small island...the most distant town where anyone may be at is located within a two and a half hour drive. She normally is much closer.

I trust this covers the requested additional information.

Yours truly,

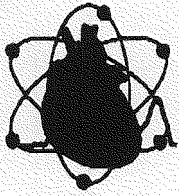

Humberto O. Quintana Irazola, M.D.

LETTER OF AGREEMENT

As per 10 CFR, Part § 35.24 Maria M. Palacios is hereby appointed as Radiation Safety Officer to be responsible for implementing the radiation protection program.

The Radiation Safety Officer is provided sufficient authority organization freedom, time, resources, and management prerogative to:

1. Identify radiation safety problems.
2. Initiate, recommend or provided corrective actions.
3. Stop unsafe operations; and
4. Verify implementation of corrective actions

Humberto O. Quintana Irazola, MD. FACC
Cardiologist

I accept the responsibilities described above.

Maria M. Palacios
Radiation Safety Officer
