Basis for authorizing Erwin W. Ruff as Authorized Medical Physicist (AMP)

In addition to the information submitted in this amendment request, I also reviewed the additional information submitted with mail control 143106 (the first amendment request to add Mr. Ruff), documenting completion of the requirements of 35.51(c), including Table 3c of Form 313A(AMP).

Basis for removing Karl Raska, M.D. as a non-medical authorized user (AU)

Licensee no longer uses radioisotopes listed in 6.F to 6.J

Basis for not needing an environmental assessment of licensee facility.

A historic review of licensing actions and inspections for License No. 29-07566 indicated that the only radioisotope used by Karl Raska was P-32 . No non-human use involved radioisotopes with a half-life greater than 120 days

Basis for authorizing Erwin Ruff as AMP for Varian VariSource high dose rate remote after loader unit.

Mr. Ruff was trained at White Plains Hospital, White Plains NY. A review of NY license number 1059 in ADAMS confirmed that the proposed AMP had trained on the same HDR model as the one at St. Peter's. See ML#092150076 in ADAMS or the mail control number 143968 of the licensing action containing this license.
