(NOTE: This will be used as the Documents Title in ADAMS)

Ms. Denman called because the licensee was having difficulty disposing of the dose calibrator reference sources and the flood source for the camera. Nuclear Diagnostic Products would not pick up the sources until such time as they were paid to do so. Ms. Denman indicated that the licensee's corporate office would not be able to cut a check for Nuclear Diagnostics for a little while. She was unsure how long it would take to dispose of the sources. I discussed the matter with my Branch Chief and it was decided that the best course of action would be to change the licensing action from a termination to a renewal for a possession only license. I informed Ms. Denman of the decision and she stated that she would send in a letter later today requesting the change.

Action Required: Place in ADAMS
