September 9, 2009

Control No. 318394

In response to request for additional information please consider the following:

In addition to the Radiation Safety Officer training mentioned in our original letter I have assisted our previous Radiation safety Officer, Donald Daavetila, in all aspects of his duties in that position at Michigan Technological University from November of 1992 until his replacement by Jonathan Stone in 2008. Specifically, I have assisted Mr. Daavetila during inspections of research laboratories using ^{32}P , ^{33}P , ^{14}C , ^3H , ^{35}S , ^{125}I , ^{203}Hg , and a number of radioactive sources, including ^{60}Co , ^{63}Ni , and ^{137}Cs , in a variety of instruments and forms. I have also scheduled and participated in all radiation safety committee meetings and provided radiation safety training during our annual faculty and graduate student safety meetings. I have been responsible for reviewing all monthly radiation monitoring badge reports and following up on all anomalies and other issues related to the reports and assisting faculty in the selection of monitoring badges since 1992.

I am aware of my designation as Radiation Safety Officer for Michigan Technological University, replacing Jonathan Stone, the current Radiation Safety Officer, and am aware of the duties and responsibilities that the position entails.

Sincerely,

Dr. Allen Nicmi, Director
Occupational Safety and Health Services
