REPLY TO A NOTICE OF VIOLATION

Docket No. 030-32304
License No. 43-27362 -01

To whom it may concern:

Following is the answer to NOV dated July 23, 2009:

1. Reason for the violation;

Failure by the responsible Radiographer to record the physical survey of the restricted area.

The area was roped and the proper signs were in place and the survey was completed by the Assistant Radiographer but was not recorded.

This and other discrepancies were a pattern for this Radiographer. He was only with us for about three months.

2. Action to prevent recurrence;

Additional emphasis on the importance of following **ALL** the radiation safety rules including the records, This emphasis has been ongoing in our safety meetings.

3. Full compliance was achieved in May of 2008 with the termination of the above referenced Radiographer with an occasional unintentional omission due to human error.

Sincerely,

Douglas R. Johnston
RSO
