MEMORANDUM TO: William F. Burton, Branch Chief
Rulemaking and Guidance Development Branch
Division of New Reactor Licensing
Office of New Reactors

FROM: Sheryl A. Burrows, Project Manager */RA/*
Rulemaking and Guidance Development Branch
Division of New Reactor Licensing
Office of New Reactors

SUBJECT: SUMMARY OF AUGUST 14, 2009 CLOSED MEETING WITH
THE INDUSTRY TO DISCUSS INTERIM STAFF GUIDANCE
FOR CYBER SECURITY

On August 14, 2009, the U.S. Nuclear Regulatory Commission (NRC) staff from the Office of New Reactors (NRO), Office of Nuclear Reactor Regulations (NRR), and Office of Nuclear Security and Incident Response (NSIR), held a closed meeting with representatives from the industry to discuss the technical criteria for cyber security in the development of safety systems, and the format and content of Interim Staff Guidance that the NRC staff is developing to provide technical guidance in support of cyber security system development activities. The meeting was closed to the public because the NRC staff had determined that some of the information to be discussed is security-related information.

NRC staff presented slides that gave an overview of cyber security programmatic and system design requirements and associated guidance, NRC roles and responsibilities in the review of cyber security issues, and NRC staff resolution of industry comments on the cyber security Project Plan. In addition, the NRC staff presented slides providing more detailed information and examples related to activities performed throughout the secure software development lifecycle.

Following the presentations and discussions, the industry agreed to identify additional items requiring clarification or resolution.
