Subject: Periodic Meeting Summary

Jim -

Thank you for sending us the draft summary of the July 28 NRC/NYSDEC periodic meeting for review.

We agree with the contents of your summary, but have a few minor comments to offer:

1. It may be useful to include more identifying information on the list of attendees. For example, although David O'Toole is the Assistant Division Director, he is the Assistant Director of the Division of Solid & hazardous Materials. Likewise, Robert Phaneuf is the Acting Director of the Bureau of Hazardous Waste and Radiation Management. Timothy Rice is the Chief of the Radiological Sites Section, and I am the Chief of the Radiation Control Permits Section.

2. Under the section of the report entitled "Organization," the summary states, "The Program administers approximately 30 effluent release permits for the licenses issued by the New York State Department of Health." The sentence should be revised to say, "...issued by the New York State and New York City Departments of Health."

Thank you for the opportunity to review and comment. If you have any questions, please call me at 518-402-8579.
