Randy,

Thank you for getting back to me this past Friday regarding the status of the virtual reading room. It is my understanding now that Detroit Edison's IT staff expects this to be available to NRC and its contractors in early October 2009. Please continue to stay on top of this because, as discussed in my email below, we need access to this virtual reading room ASAP.

Also, per your request, listed below are the names and organizational affiliations of the staff who will need access to the virtual reading room. If and when there are any changes to this list, I will let you know.

Randy,

What is the status and timing of getting the subject portal up and running, and can this be accelerated? We need easier access to reading room materials than we currently have at DTE Energy locations (especially at the most important location near Chicago), to facilitate our further review of documents requested in RAIs and determination of exactly what we needed submitted for docketing.

Please let me know.

Thanks,
Steve
