Dear Ms. Modica:

During a public meeting on May 6, 2009, you asked what lessons were learned from an event involving the loss of power to criticality accident detectors. A violation related to the event was cited in Inspection Report No. 70-143/2007-008 (Violation no. 2007-008-002). I apologize that it took so long to reply to your question.

Nuclear Fuel Services replied to the Notice of Violation on January 25, 2008. This letter is in ADAMS as a non-public document. I attempted to get the letter redacted. Disagreements regarding what information could be released caused significant delays.

After some time, it was suggested that I look for the inspection report that closed the violation. I'm sorry I didn't think of it sooner. When I searched, I discovered that the violation was closed in Inspection Report No. 70-143/2008-001 issued on May 5, 2008. It is available in ADAMS under ML081270020. I am attaching a copy of the report to this message. The information closing the violation can be found on Page 10 of the report.

Please let me know if you have any questions regarding this information.

Kevin M. Ramsey
Senior Project Manager
Fuel Manufacturing Branch
