SUBJECT: NRC ISFSI SECURITY INSPECTION REPORT 05000266/2009-404(DNMS);  
05000301/2009-404(DNMS) – POINT BEACH NUCLEAR PLANT

Dear Mr. Meyer:

On August 26, 2009, the U.S. Nuclear Regulatory Commission (NRC) completed a security inspection of the Independent Spent Fuel Storage Installation (ISFSI) at the Point Beach Nuclear Plant (PBNP), Two Rivers, Wisconsin. The purpose of the inspection was to evaluate whether the protection of the ISFSI was in compliance with the PBNP ISFSI Physical Security Plan (PSP), ISFSI security implementing procedures, and the NRC Order EA-02-104 transmitted as an enclosure to NRC letter dated October 16, 2002, "Issuance of Order for Interim Safeguards and Security Compensatory Measures for Point Beach Nuclear Plant." In addition, the inspectors determined whether the use and storage of your two instrument calibrators was conducted safely and in accordance with 10 CFR Part 20 requirements. At the conclusion of the on-site inspection on August 26, 2009, the inspectors discussed the inspection findings with members of your staff.

Based on the results of this inspection, no findings of significance were identified.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records System (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room). However, because of the security-related discussion contained in the enclosure, and in accordance with 10 CFR 2.390, a copy of this letter's enclosure will not be available for public inspection.

Enclosure Contains Sensitive Unclassified Non-Safeguards  
Information. When separated from enclosure, this  
transmittal document is decontrolled.
