| MATERIALS LICENSE<br>SUPPLEMENTARY SHEET |  | MATERIALS LICENSE<br>SUPPLEMENTARY SHEET   | Docket or Reference Number<br>030-00810  |  |  |
|  |  |  |  | Amendment No. 65   |  |
|  |  |  |  |  |  |
| 14.                                      | <ol> <li>Detector cells containing licensed material shall not be opened or the sources removed from the<br/>detector cell by the licensee.</li> </ol>   |  |  |  |  |
| 15.                                      | A.   | (1)  | The source(s) specified in Item(s) 7.J. shall be tested for leakage and/or contamination at intervals not to exceed 6 months. Any source received from another person which is not accompanied by a certificate indicating that a test was performed within 6 months before the transfer shall not be put into use until tested. |  |  |
|  |  | (2)  | Notwithstanding the periodic leak test required by this condition, any licensed sealed source is exempt from such leak tests when the source contains 100 microcuries or less of beta and/or gamma emitting material or 10 microcuries or less of alpha emitting material.   |  |  |
|  |  | (3)  | Except for alpha sources, the periodic leak to<br>sealed sources that are stored and not being<br>shall be tested for leakage before any use o<br>been leak tested within 6 months before the  | est required by this condition does not apply to<br>g used. The sources excepted from this test<br>r transfer to another person unless they have<br>date of use or transfer. |  |
|  | В.   | Any s<br>stora   | Any source in storage and not being used need not be tested. When the source is removed from storage for use or transfer to another person, it shall be tested before use or transfer.   |  |  |
|  | C.   | The leak test shall be capable of detecting the presence of 0.005 microcurie (185 becquerels) of radioactive material on the test sample. If the test revealed the presence of 0.005 microcurie (185 becquerels) or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission in accordance with 10 CFR 30.50(c)(2), and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations. |  |  |  |
|  | D.   | Tests for leakage and/or contamination shall be performed by the licensee or by other persons specifically licensed by the Commission or an Agreement State to perform such services.  |  |  |  |
| 16.                                      | 6. Sealed sources containing licensed material shall not be opened.  |  |  |  |  |
| 17.                                      | 7. The licensee is authorized to hold radioactive material with a physical half-life of less than or equal to 120 days for decay-in-storage before disposal in ordinary trash, provided:       |  |  |  |  |
|  | A.   | A. Before disposal as ordinary trash, the waste shall be surveyed at the container surface with the appropriate survey instrument set on its most sensitive scale and with no interposed shielding to determine that its radioactivity cannot be distinguished from background. All radiation labels shall be removed or obliterated.  |  |  |  |
|  | B. A record of each such disposal permitted under this license condition shall be retained for 3 years. The record must include the date of disposal, the date on which the byproduct material |  |  |  |  |

was placed in storage, the radionuclides disposed, the survey instrument used, the background dose rate, the dose rate measured at the surface of each waste container, and the name of the individual who performed the disposal.
